Chin.....	3
Neck.....	2
BODY	40 points
Torso.....	12
Musculature.....	10
Boning.....	8
Legs and Feet.....	5
Tail.....	5
COAT	20 points
Texture.....	20

CATEGORIES: Traditional and pointed.

DIVISIONS: All.

COLORS: All.

PERMISSIBLE OUTCROSSES:

Oriental Shorthair, Siamese, Donskoy

HEAD:

Shape: Long, inverted triangle, measuring from ear tip to ear tip to blunted muzzle, forming a wedge. Flat forehead and flat high cheekbones.

Ears: Extra large, pointed, and broad at the base, slightly flared. Set to extend just below the line of the wedge.

Eyes: Medium in size, almost almond in shape. Obliquely set, flush with the skull, neither protruding nor recessed. Distance between eyes not less than width of one eye. Eye color independent of coat color.

Profile: Straight nose and flat forehead forming two distinct flat planes meeting midway over the eyes in a convex angle. Two-planed.

Muzzle: Strong, slightly blunt and not narrow. Smooth wedge with no whisker pinch, although whisker pads will be evident. Whiskers, if present, should be crinkly and kinky and may be or appear to be broken.

Chin: Strong, straight line from tip of nose to tip of chin. Not protruding.

Neck: Long and slender.

BODY:

Torso: Medium-sized, long and graceful. Shoulders and hips equal in width.

Legs: Long, medium-fine boned. Firm muscles. Straight vertical forelegs. Hind legs slightly longer than front legs.

Feet: Oval, medium in size with long, agile prominent toes and non-prominent foot pads.

Tail: Long, strong and whippy.

Musculature: Firm and well-developed.

Boning: Medium-fine.

COAT: The Peterbald coat is the single most important feature of the breed. A Peterbald may have a single coat type or it may have a combination of coat types. Generally, if there is more than one coat type, the body has one type and the extremities or points have another. A Peterbald may be born with one coat type which changes to a different type over time. Peterbalds may be born with or without coat. Those born bald may be 100% hairless or may have barely discernible fine residual hair at the base of the ears, on the muzzle, feet, lower legs and tail that feels like velvet. Except in those Peterbalds that are born completely hairless with no whiskers or eyebrows, the Peterbald coat changes or evolves with age. For those born with coat, that become hairless, loss of coat begins at the top of the head or nape of the neck and continues down the body to the tail. Short fine down may be retained on the extremities. There are two basic Peterbald coat textures: hairless and brush. The hairless Peterbald has soft, warm, elastic skin that may range from "sticky" to having a texture akin to suede or peach skin or feeling like silk. The hairlessness can range from being 100% hairless to having almost imperceptible fine hairs, to having short fine, down which appears truly

hairless when viewed from a distance. When inspected closely there are clearly visible hairs. Coat that is retained on the extremities is short, close-lying and downy. Brush coat ranges from a sparse wiry coat of irregular texture in which the skin is seen through the coat, to a dense, wiry, short, wavy or kinky brush coat. Brush coat ranges from 5mm or longer in length and should in no way feel or look like a normal coat when closely inspected. A cat with heavy dense brush coat will not lose its coat.

GENERAL DESCRIPTION: The overall impression of an ideal Peterbald is an elegant and intelligent cat. The Peterbald has a sturdy, long, lean body that contributes to its graceful movement. The first Peterbalds were born in Russia in January, 1994, the result of breeding an Oriental Shorthair (Radma vom Jagerhof) to a light-boned Oriental-looking Donskoy (Afinoguen Myth). The original litter demonstrated that the Peterbald/Donskoy gene is a dominant gene, unlike the (Canadian) Sphynx gene. Typical of the breed are various unusual coat textures ranging from hairless to full brush coat to normal coat.

LOCKETS: Allowed.

PENALIZE:

Head: Curved profile; weak chin; muzzle break.

Body: Heavy, rounded body; bowed forelegs.

WITHHOLD ALL AWARDS (WW): Long haired cats; normal coat.

DISQUALIFY (DQ): Protruding sternum; visible tail fault; crossed eyes. Any sign of any means of artificial hair removal.

Temperament must be unchallenging; any sign of definite challenge shall disqualify. The cat may exhibit fear, seek to flee, or generally complain aloud but may not threaten to harm. In accordance with Show Rules, ARTICLE SIXTEEN, the following shall be considered mandatory disqualifications: a cat that bites (216.9), a cat showing evidence of intent to deceive (216.10), adult whole male cats not having two descended testicles (216.11), cats with all or part of the tail missing, except as authorized by a Board approved standard (216.12.1), cats with more than five toes on each front foot and four toes on each back foot, unless proved the result of an injury or as authorized by a Board approved standard (216.12.2), visible or invisible tail faults if Board approved standard requires disqualification (216.12.4), crossed eyes if Board approved standard requires disqualification (216.12.5), total blindness (216.12.6), markedly smaller size, not in keeping with the breed (216.12.9), and depression of the sternum or unusually small diameter of the rib cage itself (216.12.11.1). See Show Rules, ARTICLE SIXTEEN for more comprehensive rules governing penalties and disqualifications.
