

Hi, my name is Alessio Pasquini of Nudelook Sphynx and I reside in Pisa, Italy.

I am one of the founder of the TICA Italian Club (TICat) and an active regional member of TICA Europe South.

We have met the goals we set for 2016/2017/2018 with the highest number of shows organized along with the highest cat/exhibitor counts in Southern Europe.

My job has been to introduce TICA to Italy and to recruit and educate breeders to feline husbandry practices, showing their cats to meet TICA guidelines and hopefully allow them to have a great time at the shows while getting to know one another!

I was owned by my first Sphynx in 2005.

These magnificent creatures instantly mesmerized me and changed my life forever.

My cats are my life and we walk and improve together.

I was going through some personal challenges at the time and my sphynx always greeted me at the door when I came home.

Later I began to research their history and origin and could not seem to get information fast enough.

I had the opportunity to meet some other sphynx owners along the way and realized they were a close community.

Beautiful Sphynx is not enough for me, Sphynx need also a healthy future.

I started searching the old lines of Sphynx because in there I saw the magic...the miracle of it's beauty of the past that can blend with the knowledge of the present for a better and healthier future.

Thanks to this I had the honor to know great breeders, who started their work to improve this breed many years ago, and always available, ready and awake for me to share my thoughts.

Thus my breeding program began in earnest and I was hooked.

Showing them followed so that I could meet other sphynx breeders and see the results they were achieving in their individual breeding programs.

The rest is history and I can truly say I have enjoyed every step.

Nothing makes me happier than my cats and giving them the respect that I promised when I began my breeding program,

but is not everything about my cats, and what is happening to our planet and our community because of COVID, has given me time to reflect even more, looking my cats in the eye,

and confirming that every cat around the world needs a little effort ours to make their life better.

I have helped the redemption of several unfortunate cats during the lock down, taking drastic precautions not to harm my cats when I came home,

these were small contributions in comparison to how much help these cats need, but every little help gives a little hope.

I am also repaying the favor to those that helped me on my journey by being available to help others when they ask for it. I do this from my heart.

I am currently on your Sphynx Breed Committee to share information and help to educate other breeders and enthusiasts while striving to increase awareness of challenges facing the Sphynx.

I have organized a Sphynx Breed Congress here in Italy in March 2017, and February 2020 as I promised during my current term, and I was available at the Sphynx Breed booth in the TICA Annual in Las Vegas.

I have been humbly available to all breeders who have asked for my opinion or support, because good communication between breeders is important, nobody is here to judge but to grow together.

I and my cats have always and will continue to contribute to grow information in HCM databases because we believe in the transparency of data sharing to make the path of other breeders less difficult.

I am asking you to allow me to support your wishes by being your representative with the Sphynx Breed Committee again.

I am the administrator of the Progressive Sphynx Alliance Facebook Group which was created to share information about Sphynx and to be a great community of collaboration..... and I am admin of the TICA ITALIA Facebook Page, always ready and humble to improve together.

In my role as Sphynx Breed Committee member I would work closely with the Sphynx Breed Section to be always up to date to be able to share with all breeders.

I will be an active member and keep you all informed of what the committee is considering.

I will continue to organize TICA shows in Italy and to help other breeders discover the world of TICA.

I will work to organize other Sphynx Breed Congresses in Europe, the next will be at the upcoming TICA show in Italy with a great Sphynx Breed Presentation in two languages, where we have already more of 55 Sphynx in the waiting list.

I will organize donation drives in some of our shows to assist with HCM research in the USA and Europe.

I will represent the Sphynx Breed at shows here in Europe and provide regular Breed presentations for our judges to continue their educational requirements.

I will be present in other Sphynx Breed Congresses organized around the world to share in the camaraderie of these great events and assist in any way that I can.

I will continue to help other breeders and will share everything I have learned because hopefully this will bring us happy and healthier cats in our world and the opportunity for cats to have a healthy life with healthy offspring.

This is not all about us as breeders and enthusiasts. Supporting and collaborating as a group benefits us but most importantly it benefits our cats. This should be the main purpose for candidacy in our Sphynx Breed Committee.

Love is not about what you give or what you receive. It's about commitment, respect, honesty, promises kept, desire, and understanding . Love includes all of these things together but is also about how you feel when you're with them.

If you feel good about you, everything else comes very naturally. You want to listen, improve, keep your promises and respect each other.

I will do this with your valuable input!

If you have any questions please contact me at ilgattoblu@hotmail.com.

Thank You for your time!
