Recommendations from the Realignment Committee

Remember that the purpose of realignment is to provide representation of approximately equal numbers by each director.

Recommend creation of an International region consisting of the following:

Australia
Brunei/Daressalam
China
Hong Kong
Indonesia
Kuwait
Malaysia
New Caledonia
New Zealand
Phillipines
Qatar
Saudi Arabia
Singapore
South Africa
Taiwan
Thailand
UAE

Total membership is 238 making it larger than South America.

Suggest that there be an associate director appointed with a view to electing a full director once leadership can be developed in that region. Consider adding Korea to the International region if Mrs. Oizumi thinks that would be better.

Recommend moving Belgium to ES

Current EN membership was 497 - ES was 379 - revision yields EN 461 ES 415

In North America there is a huge imbalance

GL	455
MA	263
MP	234
NE	440
NW	339
SC	533
SE	455
SW	298

Membership on July 1 was 5115 - dividing that by the current 13 regions yields an average of 393, and you can see we are way off in multiple regions.

GL, NE, SC and SE are high and MA, MP, NW and SW are low.

US/Canada/Mexico total 3016 - divided by the current 8 North American regions yields an average of 377 to shoot for.

There seems to be general consensus on the west coast that the three current regions aren't working.

The committee has been working from membership data as of 7/1/14.

Attached is a spreadsheet with one idea of how to equalize the North American Regions (Realignment 11/14) - it includes elimination of the MP region and creation of a new (working name) Intermountain Region

There will certainly be a LOT of discussion, and the committee was by no means in agreement with this - but it provides a starting point

Suggested International Region Composition

INDEPENDENT AUDITORS' REPORT

Board of Directors
The International Cat Association, Inc.

We have audited the accompanying financial statements of The International Cat Association, Inc. (a nonprofit organization), which comprise the statements of financial position as of June 30, 2014 and 2013, and the related statements of activities and cash flows for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of The International Cat Association, Inc. as of June 30, 2014 and 2013, and the changes in its net assets and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

The International Cat Association, Inc.
NOTES TO FINANCIAL STATEMENTS
June 30, 2014 and 2013

NOTE A - SIGNIFICANT ACCOUNTING POLICIES

The International Cat Association, Inc. (known as "TICA") was incorporated October 25, 1982 under the Texas Non-Profit Corporation Act, with its primary purpose being the promotion and dissemination of educational and scientific information on felines to the general public. The Board of Directors, comprised of a President and Vice-President, and Regional Directors, oversees the activities of the Association.

Basis of Accounting

Basis of accounting refers to when revenues and expenditures or expenses are recognized in the accounts and reported in the financial statements. Basis of accounting relates to the timing of the measurements made, regardless of the measurement focus applied.

The Association is required to report information regarding its financial position and activities according to three classes of net assets; unrestricted net assets, temporarily restricted net assets, and permanently restricted net assets.

Membership Receivables

Membership receivables are recorded at the amount the Association expects to collect on balances outstanding at year end. Management closely monitors outstanding balances and writes off, as of year end, all balances that it deems to be uncollectible.

Revenue Recognition

Contributions received are recorded as unrestricted, temporarily restricted, or permanently restricted support, depending on the existence and/or nature of any donor restrictions. Contributions received with donor-imposed restrictions that are met in the same year in which the contributions are received are classified as unrestricted contributions.

All donor-restricted contributions are reported as an increase in temporarily or permanently restricted net assets, depending on the nature of the restriction. When a restriction expires (that is, when a stipulated time restriction ends or purpose restriction is accomplished), temporarily restricted net assets are reclassified to unrestricted net assets and reported in the statement of activities as net assets released from restrictions. No activity was temporarily or permanently restricted during the years ended June 30, 2014 and 2013.

Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

The International Cat Association, Inc.
NOTES TO FINANCIAL STATEMENTS - CONTINUED
June 30, 2014 and 2013

NOTE A - SIGNIFICANT ACCOUNTING POLICIES - Continued

Concentrations of Risk

Concentrations of Risk Due to Temporary Cash Investments and Trade Accounts Receivable

Financial instruments that potentially subject the Association to concentrations of risk consist principally of temporary cash investments and trade accounts receivable. The Association places its temporary cash investments with financial institutions and limits the amount of credit exposure to any one financial institution. Concentrations of credit risk with respect to trade accounts receivable are limited due to the large number of members comprising the Association's membership and their dispersion across different geographic areas.

Concentration of Risk Arising from Cash Deposits in Excess of Insured Limits

The Association maintains cash balances with high quality credit institutions. At times such cash and investments may be in excess of the FDIC insurance limit.

Income Taxes

For the period ended June 30, 2013, income taxes are calculated using the liability method in accordance with the provisions set forth in generally accepted accounting standards. Deferred income tax assets and liabilities are computed annually for differences between the financial statement and tax basis of assets and liabilities that will result in taxable or deductible amounts in the future based on enacted tax laws and rates applicable to the periods in which the differences are expected to affect taxable income. Valuation allowances are established when necessary to reduce deferred tax assets to the amount expected to be realized. Income tax expense is the tax payable or refundable for the period plus or minus that change during the period in deferred tax assets and liabilities.

TICA has adopted FASB Accounting Standards Codification (ASC) 740-10, *Accounting for Income Taxes*. The accounting standard on accounting for uncertainty in income taxes addresses the determination of whether tax benefits claimed or expected to be claimed on a tax return should be recorded in the financial statements. Under that guidance, TICA may recognize the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by taxing authorities based on the technical merits of the position.

As a result of the implementation of ASC 740-10-50, *Accounting for Uncertainty in Income Taxes*, TICA did not recognize a liability for unrecognized tax benefits.

TICA's Form 1120, *U. S. Corporation Income Tax Return*, for the years ending 2012, 2013 and 2014 are subject to examination by the IRS, generally for 3 years after they were filed. TICA is not currently under examination by any federal or state taxing authorities. It is TICA's policy to recognize interest and/or penalties related to uncertain tax positions, if any, in income tax expense. As discussed in Notes D and E, the Association received approval of its exempt status effective February 11, 2014. Income taxes have been accrued through that date.

Inventories

Inventories of supplies for resale as of June 30, 2014 and 2013, is stated at principally the lower of cost or market. Cost is determined on the first-in, first-out basis.

The International Cat Association, Inc.
NOTES TO FINANCIAL STATEMENTS - CONTINUED
June 30, 2014 and 2013

NOTE A - SIGNIFICANT ACCOUNTING POLICIES - Continued

Property, Plant and Equipment

Property, plant and equipment acquisitions have consistently been recorded at cost if purchased or fair value at date of gift if donated. Major renewals and improvements which extend the life of an asset or benefit one or more subsequent periods are capitalized. Replacements, maintenance, and repairs which do not extend or improve the life of existing assets are charged against income in the period incurred. When properties or equipment are retired or otherwise disposed of, the property and related accumulated depreciation accounts are relieved of the applicable amounts. Gains or losses from normal retirements or sales are credited or charged to income.

Depreciation

Equipment and furniture are being depreciated using the straight-line method over their estimated useful lives, ranging from 3 to 10 years. Depreciation expense totaled \$12,183 and \$11,950 for the years ended June 30, 2014 and 2013, respectively.

Cash and Cash Equivalents

For purposes of the statements of cash flows, the Association considers all highly liquid debt instruments with a maturity of three months or less to be cash equivalents.

Certificates of Deposit

Certificates of deposit, totaling \$172,236 and \$171,916 at June 30, 2014 and 2013, respectively, are presented on a separate line on the accompanying financial statements. The certificates bear interest ranging from .20% to .30% and have maturities ranging from three months to one year, with penalties for early withdrawal. Any penalties for early withdrawal would not have a material effect on the financial statements.

Non-Profit Status

The Association has adopted the policy that no member shall personally profit from the operations of the Association except for reasonable compensation for services actually rendered by officers and employees of the Association.

Prepaid Expenses

Prepaid expenses are advance payments for products or services that will be used in operations at some future period.

Advertising

The Association expenses all advertising costs when incurred.

The International Cat Association, Inc.
NOTES TO FINANCIAL STATEMENTS - CONTINUED
June 30, 2014 and 2013

NOTE A - SIGNIFICANT ACCOUNTING POLICIES - Continued

Credit Memos

Credit memos are generated when customers overpay for services or remit payment for registrations that are pending approval or required documentation. The credits are reduced when customers are refunded or once required documentation is received and the registration is granted.

Compensated Absences

The Association allows full-time employees to receive compensation for vacation leave. Vacation hours, which accrue from the first day of employment, can be taken as soon as the initial probationary period has lapsed. The estimate related to compensated absences is based on vacation hours earned and current pay rates. The cost of compensated absences is recognized as salary and wage expense.

NOTE B – OPERATING LEASES

On March 1, 2012, TICA entered into a five year operating lease for office space. The monthly payments on the lease are \$2,565.

The following is a schedule by years of future minimum payments required under the lease agreement as of June 30:

Year Ending June 30:	
2015	\$ 30,780
2016	30,780
2017	<u>23,085</u>
	<u>\$ 84,645</u>

On January 28, 2011, TICA entered into a sixty-six month operating lease for a postage machine. The monthly payments on the lease are \$532.

The following is a schedule by years of future minimum payments required under the lease agreement as of June 30:

Year Ending June 30:	
2015	\$ 6,384
2016	6,384
2017	<u>3,724</u>
	<u>\$ 16,492</u>

The International Cat Association, Inc.
NOTES TO FINANCIAL STATEMENTS - CONTINUED
June 30, 2014 and 2013

NOTE B – OPERATING LEASES – Continued

On April 25, 2012, TICA entered into a sixty month operating lease for a printer machine. The monthly payments on the lease are \$2,195.

The following is a schedule by years of future minimum payments required under the lease agreement as of June 30:

Year Ending June 30:	
2015	\$ 26,340
2016	26,340
2017	<u>21,950</u>
	<u>\$ 74,630</u>

Total lease expense charged to operations amounted to \$41,243 and \$40,175 for the years ended June 30, 2014 and 2013, respectively.

NOTE C - EMPLOYEE BENEFIT PLAN

TICA has a defined contribution retirement plan covering all employees who have worked at the Association longer than one year. Under the plan, TICA will match an employee's salary deferral contributions up to a maximum of 3% of the employee's compensation. Under the Internal Revenue Code, the plan is referred to as a Savings Incentive Match Plan for Employees.

NOTE D - FEDERAL INCOME TAXES AND DEFERRED INCOME TAXES

As discussed in Note A, the Association was organized and incorporated under the Texas Non-Profit Corporation Act and filed an application for exempt status. The Association had originally intended to be exempt from federal income taxes under the provisions of Section 501(c)(6) of the Internal Revenue Code. However, the application originally submitted to the Internal Revenue Service in 1993 for consideration as a not-for-profit, exempt organization under Section 501(c)(6) of the Internal Revenue Code was denied. As a result, TICA has filed federal income tax returns as a for-profit corporation with applicable provisions made for federal income taxes. Deferred income taxes are computed by applying statutory rates to temporary differences between the recognition of income and expense for financial statements and income tax return purposes based upon the expected period in which the differences will reverse. The principal difference arises from the use of different methods of depreciation for financial reporting and tax return purposes. The provision for federal income taxes is computed on pre-tax accounting income at statutory rates.

As further discussed in Note E, the Organization received notice in September 2014 that approval of exempt status was granted under provisions of Section 501(c)(4) of the Internal Revenue Code. The exemption is effective as of February 11, 2014. As such income taxes have been accrued for the period of July 1, 2013 to February 10, 2014. All deferred taxes as of that date have been eliminated due to the change in tax status.

The International Cat Association, Inc.
NOTES TO FINANCIAL STATEMENTS - CONTINUED
June 30, 2014 and 2013

NOTE D - FEDERAL INCOME TAXES AND DEFERRED INCOME TAXES - Continued

Federal and state income taxes for the fiscal year ended June 30 consisted of the following:

	<u>2014</u>	<u>2013</u>
Current		
Federal	\$ 14,100	\$ 48,119
State	<u>3,468</u>	<u>7,601</u>
	17,568	55,720
Deferred		
Federal	<u>10,138</u>	<u>(757)</u>
Provision (benefit) for income taxes	<u>\$ 27,706</u>	<u>\$ 54,963</u>

The components of the deferred tax as of June 30 are as follows:

	<u>2014</u>	<u>2013</u>
Long-term deferred tax liability		
Depreciation	\$ -	\$ 3,768
Long-term deferred tax asset		
Reserve for compensated absences	<u>-</u>	<u>2,730</u>
Net deferred tax liability	<u>\$ -</u>	<u>\$ 1,038</u>

NOTE E - SUBSEQUENT EVENTS

For purposes of reporting subsequent events, management has considered events occurring up to October 21, 2014; the date the report was available to be issued.

By determination letter dated September 8, 2014, the Association was granted tax exempt status under Section 501(c)(4) of the Internal Revenue Code effective February 11, 2014. Therefore, an amended Form 1120 was filed for the period of July 1, 2013 up to February 10, 2014 due to the fact the Association's Form 1120 was previously filed. Adjustments have been made to the Association's financial statements included in this report to reflect the Association's current tax situation. The Association will begin to file a Form 990 for the period of February 11, 2014 through June 30, 2014 and in future years since it is now a tax exempt entity.

Amend Show Rule 216.9 (Biting) – Board Directive

The Board rejected a member's amendment to the above rule at the 2014 Annual, but asked the committee to address the issue that the cat should be absent for the rest of the day.

Rules Committee Comments:

The consensus was that the rule, as it stands, is adequate if the correct process is followed. Enforcement should be addressed through the Judge's Newsletter and/or List, since we understand that a number of judges appeared unaware of the process.

The Committee noted that the rule states: "a judge shall disqualify and dismiss from the ring any cat that bites". It is clear that it is not specifying who the cat bites, which means that if the cat bites anyone in the ring (e.g. a trainee or handler) it should be DQ'd.

On the topic of whether a cat should be absent from all subsequent rings once it bites, the view of this committee was that this might be too restrictive and that discretion was needed. No amendment was therefore required.

Add Show Rule 216.9.1 (Fines for Biting) – Stadter

Rationale:

Currently there is no consequence for the exhibitor bringing out a cat repeatedly even if it has shown aggressive behavior. If a cat demonstrates it is not happy in the show ring the exhibitor may be subject to a fine for putting the cat back in the show ring after it has already hurt someone.

Addition:

Add new Show Rule 216.9.1 and renumber existing 216.9.1 to 216.9.2

216.9.1 The exhibitor of a cat that is disqualified from competition for biting a second or third time shall be fined according to the current price list.

Rules Committee Comments:

- 1) From a rules standpoint this is fine, and I agree it is a reasonable option that may make people think twice about bringing their aggressive cats back to the ring.
- 2) So we are also going to fine the judges that are repeatedly bitten? Some judges are bitten more than others. Sometimes it isn't about the cat, it's about the judge. Some judges may need some help in the handling area. As I've said before we cannot set up an adversarial relationship between judges and exhibitors. If we do, exhibitors will react. The cats that we are trying to get out of the show hall will get drugged and then we will have an even bigger problem on our hands because judges won't even be able to read body language and so there is a potential for them to get seriously hurt.

Some judges don't adjust their handling to the breed of cat or to the situation -- they just put the cat in a death grip and go from there and that is an invitation to get bitten. Exhibitors have cell phones and iPads and those have video cameras along of course with cameras and video-cameras. They are already taking pictures and videos of their cats being judged and this rule will push more of them to do so in order to have a record to defend their cat.

- 3) I think it is incorrect to say that there are no consequences, since the EO will not score a cat (or validate further titles) once it has been DQ'd a 3rd time for biting. Having established that some judges were not following the correct process when dealing with bites, it makes sense for the Board to monitor the situation for a few months and then see if any of the rules need adjusting. I believe that the original concern had also arisen from one particular cat, and I am always wary of creating rules out of such situations.
- 4) I agree with comments (2) and (3)
- 5) I also agree with comments (2) and (3).

Amend Show Rule 211.9 (Catalog Entries for Exhibition Only) – Crawford

Rationale:

Recent posts by west coast clubs have made me think about this again. They REQUIRE every cat in the show hall - be they exhibition only, sales cats, companion cats, etc. to be in the show hall because "it's a show rule".

As you know, little to no east coast clubs require non-competing entries to be included in the catalogs. And, of course, printing extra pages isn't "green" and people might not even know which cats they might bring for sale, to be companion cats, or to be socialized to the show hall.

That said, I propose the following show rule be changed as follows to follow actual routine practice.

Amendment

211.9 Catalogs shall contain the number of in each of the following categories: LH Kittens, SH Kittens, LH Adults, SH Adults, LH Alters, SH Alters, LH HHP Kittens, SH HHP Kittens, LH Household Pets, SH Household Pets, Preliminary New Breeds, Advanced New Breeds and New Traits classes as well as **optionally** list each entry present for Exhibition Only, including for sale cats and kittens **(unless listing of all cats and kittens present in the show hall is required to meet local laws, regulations, or club needs). If all cats and kittens present in the show hall must be listed in the show catalog, a statement must be included in the show's information provided to exhibitors (for example, the show flyer) that no cat or kitten may be in the show hall unless the cat or kitten information is provided to the club in advance and the cat/kitten information is included in the show catalog.**

Rules Committee Comments:

- 1) Even our shows in the MP & SW regions with lots of rescue cats have them all listed in the catalog and quite a number of them showing.

During the Pet Expo we did invite the rescue organizations who were outside in a courtyard to bring cats in and we would just present them and maybe give them each a toy - to help get them sold but they weren't benched in the show hall - they weren't part of the show - we were just trying to 'do good'.

I would really prefer to know who is in a show hall in the case of a disaster of some sort.

- 2) I absolutely agree that ALL cats which are in the show hall should be listed in the catalog - also the cats from shelters. I think that this is also important - if a cat hurts a visitor of a show it should be able to be identified in the catalog (including owner). This might be very important if there are law-suits.

If the cats are located outside the show venue (I mean outside the complex where the show is being held) then it might be different.

- 3) I am reluctant to recommend an alteration to an existing rule simply because some clubs within one part of TICA's world choose to ignore it.

Amend Standing Rule 2014.1.1 (Judging Fees) (Board Directive)

Work Item Description:

- Amend the current fees for judges

Rationale:

The judges' fees have not been changed for 20 years.

Amendment:

2014.1.1.1 Approved Allbreed Judge - ~~\$1~~ **\$1.25** per entry.

2014.1.1.2 Provisional Allbreed Judge - ~~\$.75~~ **\$1.00** per entry.

2014.1.1.3 Approved Specialty Judge - ~~\$.60~~ **\$.75** per entry.

2014.1.1.4 Probationary Specialty Judge - ~~\$.50~~ **\$.60** per entry

Rules Committee Comments:

(KV) - I am in favor as it has been nearly 20 years since the fees have been raised.

(EC) OK with me - we may need to revise this if/when we revise the levels

(BT) Fine with me

(MW) It's never easy having to raise fees but I think this is long overdue.

Subject: Toyger - Breed committee member

Hi my name is Gill Heaton and I have been breeding Toygers since 2007 am a member of Tica. At present we have only 2 persons on the Breed committee and I have been asked if I will be the third - would it be possible for this to happen . I have asked Helen Bouloun to e-mail also.
I look forward to hearing from you with your response.

Kind regards

Gill

THE INTERNATIONAL CAT ASSOCIATION, INC
APPLICATION OF A TRANSFER NEW BREED TO REGISTRATION ONLY
33.3.2 A TRANSFER NEW BREED may apply for acceptance as a recognized breed for REGISTRATION ONLY by making at least 90 days prior to the Board Meeting at which acceptance is submitting an electronic application to each member of the Genetics Committee and each member of the Rules Committee. Following approval of the application by the Genetics Committee and the Rules Committee, the application will be submitted by the Chair of the Rules Committee to the TICA Executive Office at least 60 days prior to the Board Meeting for inclusion in the agenda. Any comments of the Genetics Committee or Rules Committee must be included. Application must be included. Application for Registration Only Breed status must include the following:

Brief description of the breed distinguishing it from other breeds recognized by the Association.

The Aphrodite is a unique and intelligent breed selected by the rough nature of Cyprus Island. Isolated for more than 9500 years in hard circumstances of living. thus this breed is the first known witness of domestication of cats on earth. The Aphrodite exists in nature only on Cyprus Island.
Dr. Lesley Lyons studied the breed and compared it to the neighbourhood breeds fro Turkey and Europe and stated "The Aphrodite cat is the only island population that does not have any relation to mainland cats. The origin of blood is different from all other known breeds in the world and a

APHRODITE BREEDING PROGRAM PROPOSAL

At this time there are several WCF European breeders willing to register their catteries and cats in TICA. There are breeders of the Aphrodite in Poland, several in Russia, Germany, Italy, and there are a couple of breeders in China. Of course the main body of breeders and cats are on Cyprus. All are willing to work with United States breeders to bring the best cats available to the United States. Once registration is allowed, these breeders will become active in TICA and in starting new breeders interested in the breed.

At this time, there is a coalition of breeders who have had several foundation cats genetically tested by Dr. Leslie Lyons and several white cats Baer tested, and these will be brought to the U.S. as well as some third and fourth generation Aphrodites, purchased from European breeders. The first nine cats are due to arrive the beginning of September and another group in November. There will be approximately twenty cats in the U.S. by the end of the year, and some are expected to be pregnant the early part of 2015.

Cats that are genetically tested may be brought over by individuals interested in breeding through the Cyprus National Breeds Association. Cats must be genetically tested before being registered as true Aphrodite—white cats must be hearing according to the CYNBA and WCF rules if they are to be used in a breeding program. There are no outcrosses allowed. This is a very old and rare breed and Cyprus National Breeds Association wishes to keep them as genetically pure as possible. At this time we have the following people that have or will have Aphrodite cats in the United States this year and/or early 2015:

- Laurie Patton, S.E. Regional Director
- Rene and Clint Knapp, S. E. Region
- Penny and Bob Crawford, S. E. Region
- Gladys DiNunzio – M. A. Region
- B. J. McDowell and Debbie Millette (co-breeders) – G.L and S.C. Regions
- John and Bonnie Charvat – S. E. Region
- Anne Paul – S.C. Region

Offspring of these cats from the breeders listed above, will be available to be integrated into the breeding program to other interested parties. Cyprus will remain open to the United States to send cats for breeding that have been DNA tested by Dr. Lyons. Teresa and Walter Litherland of the Cyprus National Breeds Association is willing to work closely with all interested parties. They are breeders of the Aphrodite on Cyprus. WCF Allbreed Judge, Andreas M obius, from Germany, is also available to work with new breeders and help them find quality cats. Our goal is to have the necessary cats and litters registered in TICA, as well as being consistently shown in Exhibition, during the year 2015.

breed can be developed". All cats chosen for the breeding programme were selected by phenotype. Swab samples were sent to Professor Lyons for genetic testing. The test results shown that the minimum genetic make up of the cats used in the programme was not less than 90.2% Cyprus. DNA results clearly demonstrate the purity of the breed brought about 9,500 years or 18,000 generations of development by a cat breed in a captive environment with little influence from external migration. No out crosses are permitted to keep purity of breed.

A standard of the breed from another cat association.

Aphrodite Cat Standard from the WCF.

Head From the font a long triangle, cheek line straight. Long straight muzzle and nose, with a slight dip under the height of the eyes. Strong chin and teeth. Front slightly rounded, slight dome to the forehead.

Eyes Olive shaped, from a bit rounder to a bit more oval. All colors allowed. Pale blue and light yellow is valued to be as good as dark blue and green. Colors should be uniform

Ears Wide at the base, medium to large ears, placed in form of an open V with a slightly rounded space between the ears on the top-head.

Body Big and strong. Elegant, lean muscular body, not cobby. Long back and neck. Muscular shoulders and hips. Big body measurements. Morphology develops quickly. Due to development of the breed, kittens could be less muscular but big boned from the beginning. Back legs slightly longer than front legs.

Tail Medium to long and in balance with the body measurement. In shorthair variety tip of tail more slender than the heavy root.

Coat Soft cotton-wooly semi-long coat with undercoat in winter, in summer much shorter and no undercoat. Not much topcoat covering, neither in summer nor in winter. Only on back and very little(water-resistant) coat. Coat very soft to the touch. Longhair variety has full, well plumed ostrich feather tail.

Color All colors with the exception of chocolate, lilac, cinnamon and fawn, pointed colors and mink. Solid color should be without white. In bicolor non regular color setting is desired.

Proposed breeding program

The kittens/cats will be supplied by Walter Litherland, the President of Cyprus National Breed Association, and Theresa Litherland, for the purpose of the beginning a breeding program of the Aphrodite Cats in the USA with

a goal of championship status in TICA. Rene and Clint Knapp will be the suppliers to the American breeders. All kittens/cats must have a DNA test to prove purity. Buyers/Breeders agree that there will be no outcrosses. Each female supplied by the CCNBA will have three litters, with two kittens from each litter to be put back into the breeding program, some kept by the buyer while others are to be given to other breeders approved by Rene Knapp, through the CCNBA. Other kittens from the above three litters may be sold to help with veterinary bills as pets or showing alters, but must be microchipped and altered before leaving. There will be no white to white breedings allowed in the Aphrodite breeding program. Any white Aphrodite kittens received by CCNBA will have been BAER tested before approved for breeding. After the three litter requirements have been met, the buyer is free to continue his/her breeding program under the following conditions. No whole male kittens born of this kitten(s), will be ever sold or used as an exchange for a stud service until the third generation. No whole female kittens born of this kitten(s) will be sold or used as an exchange for a stud service as a breeder until the second generation. No Aphrodite cats/kittens will be sold to be used in an alternate breeding programs, i.e. Maine Coon, Siberian, Norwegian Forest Cat, etc.

Proposed Breed name that is unique

Aphrodite

A proposed two or three-letter registration code

APL Aphrodite longhair

APS Aphrodite shorthair

A proposed designation of breed classification (see 33.2)

Native

A proposed Working Breed Chair

Rene Knapp

Processing fee as specified in the Standing Rules (303.3.2)

\$50

33.3.4 Notice of intent to Apply for Advancement to Registration Only Breed status must be published in the TICA TREND at least 120 days prior to the meeting at which the application for advancement will be heard, and which invites comments about the breed to be forwarded to the Executive Office.

Date of submitted for publication in the TREND

20 July 2014

FOR INFORMATION ONLY:

33.3.2.1 It is understood that acceptance for REGISTRATION ONLY implies only that TICA agrees to provide registration facilities for development of the breed in question. There is no explicit or implied guarantee that TICA will accept the breed for championship either simultaneously or any time in the future.

33.3.5 Upon official acceptance by the Board of Directors as a Registration Only Breed cats will be registered in the Stud Book of Foundation Registry. (See 36.2, 36.3, 36.4, 36.5, and 36.6) The approved two letter registration prefix will be used (without EX)

If there are further questions please contact BJ McDowell at anthraxebola@yahoo.com or Rene Knapp at pentaclecats@sbcglobal.net

Application fee of \$50 was sent to TICA PO Box 2684, Harlingen TX 78551 by snail mail

Thank you.

THE INTERNATIONAL CAT ASSOCIATION, INC.
ADVANCED NEW BREED *ADVANCEMENT TO CHAMPIONSHIP*

Name of Breed: Austalian Mist

33.8 Championship Status Requirements. An Advanced New Breed may apply for Championship Status upon completion of the following:

33.8.1 At least 1 year has passed since the breed was first advanced to Advanced New Breed status. The Board of Directors at its discretion may reduce the time required of Transfer New Breed.

Date (meeting) advanced to ANB: August 2013

33.8.2 A minimum of 200 adults registered in any full member association of the World Cat Congress (WCC) of which a minimum of 50 are registered in TICA at a level potentially eligible for championship competition.

Attach Addendum A. (See packet)

33.8.3 List of at least 35 shows licensed by WCC organizations of which at least 10 must be TICA shows where cats have been exhibited, including region/countries and judges. A Show shall be defined as a "show catalog" for this purpose.

Attach Addendum B. (See packet)

33.8.4 List of 25 unique individual cats that have been shown, including registration numbers and region/countries shown.

Attach Addendum C. (See packet)

33.8.5 List of judges who have judged the breed.

Attach Addendum D. (See packet)

33.8.6 A minimum of 5 regions are represented by a minimum of fifteen breeders who are TICA members in good standing actively breeding the breed.

Attach Addendum E. (See packet)

33.8.7 At least 25 unique cats shown in the Advanced New Breed Class including entries shown in at least five regions during the year preceding the application.

Attach Addendum F. (See packet)

33.8.8 Submission of an electronic Application for Advancement to Championship to each member of the Genetics Committee and each member of the Rules Committee at least 90 days prior to the board meeting at which approval is sought. Any proposed modifications to a previously approved standard must be submitted with the application. Following approval of the proposal by the Genetics Committee and Rules Committee, the application must be submitted by the ANB Working Group Chair to the TICA Executive Office at least 60 days prior to the Board Meeting for inclusion in the agenda. Any comments of the Genetics Committee or Rules Committee must be included. The application must include the following: (applications available from the TICA Executive Office or at tica.org)

33.8.8.1 A Letter of Intent to apply for approval as a Championship Breed, signed by at least ten TICA members in good standing; (See packet)

33.8.8.2 A proposed breed standard; (See 33.8.8) Include as a separate document in the application packet.

33.8.8.3 A proposed breeding program; (See packet)

33.8.8.4 A processing fee of \$50. Include copy of DAR in application packet. (Completed)

33.8.9 A Notice of Intent to Apply for Advancement to Championship Status must be published in the TICA TREND at least 120 days prior to the meeting at which the application for advancement will be heard, and which invites comments about the breed to be forwarded to the Executive Office.

At the meeting of the Board where application is made: (Completed)

33.8.10 Make a formal presentation at the meeting of the Board of Directors, including photographs, illustrations, statistics, health and breeding reports, examples of the breed and any other relevant material.

FOR INFORMATION ONLY:

33.8.12 No breed may recognize for championship cats which are phenotypically indistinguishable from an already established breed; that is, each breed recognized for championship must be unique. However, this restriction does not apply to registration. Such cats are acceptable for registration and breeding purposes.

33.8.13 If the breed is approved for Championship, a Breed Committee shall be elected in the next regular election.

33.8.14 Meeting the requirements set forth in these rules does not guarantee advancement. The Board of Directors shall judge each request for advancement on a case by case basis.

33.8.15 Every NEW breed must meet the following requirements in each of the next three show years following acceptance in order to retain championship status:

33.8.15.1 Register a minimum of 25 additional cats of the breed.

33.8.15.2 Exhibit a minimum of 10 individual cats of the breed in at least 15 rings in at least 3 regions.

AUSTRALIAN MIST (AUM)

HEAD	40 points
Muzzle.....	9
Ears.....	9
Eyes.....	8
Profile.....	5
Shape.....	4
Nose/chin.....	3
Neck.....	2

BODY	35 points
Torso.....	10
Boning.....	8
Musculature.....	8
Tail.....	6
Legs/Feet.....	3

COAT/COLOR/PATTERN	25 points
Color.....	9
Pattern.....	9
Texture/Length.....	7

CATEGORY: Sepia ONLY

DIVISIONS: Tabby - Spotted and Marbled ONLY

COLORS: Limited to eumelanistic colors ONLY

PERMISSIBLE OUTCROSSES: None.

HEAD:

Shape: Broad modified wedge with gently rounded contours from front to back and from side to side. Rounded cheek bones of good breadth in proportion to the breadth of skull. *The junction of the nose, cheeks, and inner corner of the eyes forms a definite depression on either side of the bridge of the nose.*

Eyes: Medium to large, slanting slightly toward the nose, upper lid nearly straight, lower lid deeply curved, well open, set wide apart. Lustrous color in clear shadings of green ranging from chartreuse to aquamarine. Points equally divided between size, shape, set and color.

Ears: Moderately large, wide at the base, rounded tips, set as much on the top as to the side of the head, opening to the front, not upright, but angled slightly to the side, tilted slightly forward.

Muzzle: The muzzle is pronounced but not extremely wide. Foreface blunt, nose

leather and chin flanked by well developed whisker pads; all four (chin, nose, and whisker pads) of comparable shape and area, giving the appearance of a four leaf clover. Viewed from the side, all components aligned in the same vertical plane.

Chin: Firm, of sufficient depth and width to balance the depth and width of the nose leather.

Profile: A concave curve below the line of the eyes and a convex curve above that line flowing into the curve of the forehead, the two parts of the curve being of equal length.

Nose: Broad, moderately short and of even width with no distinct nose break.

Neck: Curve at back of the skull flows smoothly into a neck of medium length, in proportion to the body.

BODY:

Torso: Medium in length. Chest broad and round.

Legs/Feet: Proportionately strong, hind legs slightly higher than forelegs. Feet oval.

Tail: Length in balance with the body, thick with minimal taper, well-furred.

Boning: Medium

Musculature: Hard and muscular, heavier than it appears.

COAT/COLOR/PATTERN:

Length: Short.

Texture: Glossy, dense and resilient.

Color: Overall color should be rich and warm, paler on the underbody, with rufous toning on nose, cheeks and ears present in even the palest colors. Markings are delicate though distinct from the paler ground color. Chocolate, lilac, cinnamon and fawn kittens are very much paler than adults, with the rufous toning dominating the body markings. Full color is not obtained until two years of age

Pattern: The spotted and marbled patterns should be seen despite the diffusing effect of the characteristic misting. Pattern is more apparent when viewed from a distance.

Spotted: Body markings symmetrical spots of any size or shape over sides, flanks and belly. Elongated spots or banding on the legs permissible.

Marbled: The marbling consists of symmetrically placed patches of the darkest color, broken internally with blotches of lighter colors, on a pale ground. Margins between ground color and dark patches may be uneven, but should be clearly delineated. Ground color has uneven margins along the spine.

GENERAL DESCRIPTION: *Dr. Truda Straede created and developed the Australian Mists from her initial idea in 1977 to full championship in the Australian registries in 1986. Developed over more than 25 years - the Australian Mists have a very large gene pool derived from 50% European style Burmese, 25% Abyssinian, and 25% Domestic Spotted tabby. Outcrossing to the original breeds is no longer recommended.*

The Australian Mist is known for its exceptional temperament! It is a well-balanced gently contoured cat of moderate foreign type, with no tendency to extremes in any of its characteristics. Both males and females have well sculpted facial features creating an open generous expression. The males are usually slightly larger than females, with facial characteristics and musculature more developed. Muscle development, coat texture and eye color achieve adult expression by 2 years of age.

LOCKETS: *Withhold all awards*

ALLOWANCES: Lighter coat color in kittens. Mature males that exhibit jowls.

PENALIZE: Pinched muzzle; Roman nose; whippy tail.

WITHHOLD ALL AWARDS (WW):

~~White lockets, belly spots or White toes.~~

Blue, amber or orange eyes. Pattern on flanks obscured by over masking resulting in lack of definition.

DISQUALIFY (DQ): Any malocclusion, wry mouth, overshot or undershot jaw. Visible tail fault. Fixed deviation of the sternum in adults. Abnormal skull structure.

DEFINTIONS:

MISTING: A term referring to an effect whereby the tabby pattern definition is diffused by a combination of the sepia color restriction gene, the relative thickness of the agouti hairs and non-agouti hairs, and the length of banding on the agouti element lending an ethereal appearance.

OVERMASKING: An occurrence in tabby patterned cats whereby the pattern color becomes almost uniform over the back and down the sides such that no ticking or pattern is visible.

Temperament must be unchallenging; any sign of definite challenge shall disqualify. The cat may exhibit fear, seek to flee, or generally complain aloud but may not threaten to harm. In accordance with Show Rules, ARTICLE SIXTEEN, the following shall be considered mandatory disqualifications: a cat that bites (216.9), a cat showing evidence of intent to deceive (216.10), adult whole male cats not having two descended testicles (216.11), cats with all or part of the tail missing, except as authorized by a board approved standard (216.12.1), cats with more than five toes on each front foot and four toes on each back foot, unless proved the result of an injury or as authorized by a board approved standard (216.12.2), visible or invisible tail faults if Board approved standard requires disqualification (216.12.4), crossed eyes if Board approved standard requires disqualification (216.12.5), total blindness (216.12.6), markedly smaller size, not in keeping with the breed (216.12.9), and depression of the sternum or unusually small diameter of the rib cage itself (216.12.11.1). See Show Rules, ARTICLE SIXTEEN for more comprehensive rules governing penalties and disqualifications.

Breeding Program for the Australian Mists

The Australian Mist is a developed breed with a significant history. It was developed in Australia by Dr. Truda Straede and achieved championship status in Australia over 30 years ago. The original crosses were one half Burmese (Australian style – more European type), one quarter Abyssinian, and one quarter Domestic Shorthair Spotted tabby. Over thirty individual cats were involved in the original breedings so the breed has a very diverse gene pool. There have also been a few outcrossings since – further increasing the gene pool and adding diversity.

The cats were selected for only shorthair, tabby, Burmese gene, and eumelanistic colors. Because of the involvement of the Abyssinian, the cinnamon gene was introduced. The desired cat was a spotted or later marbled tabby in Sepia colors with a ticked overlay. Therefore the accepted colors are Seal Sepia, Chocolate Sepia, Cinnamon Sepia, Blue Sepia, Lilac Sepia, and Fawn Sepia in spotted or marbled tabby pattern.

Outcrossing

We do not feel that additional hybridization with the source breeds is needed to maintain the health of the breed at this point in time at higher generations than is allowed in TICA. Therefore we are requesting that it be considered a Category 1 breed (no outcrosses to other breeds within a 3 generation pedigree for showing in championship). This is also consistent with the registration requirements in Australia.

However there are further considerations that we recommend. It is strongly suggested that no further outcrosses be made to the Abyssinian and Burmese breeds. The gene pool in the Burmese has issues of its own and outcrosses to the Abyssinian breed have resulted in various allergies that presented as skin and asthma like disorders. There are genetic health disorders in each of the two breeds as well. DNA testing is available for most of these, but at this point there is no test available to detect the cause of higher predisposition of South East Asian cats to develop FIP. The domestic cats in Australia are primarily identified as European sourced – not Southeast Asian. So it is our recommendation that further outcrosses be domestics.

Because the Australian Mists were developed in Australia from Australian cats – we feel that this should continue at this point with any new bloodlines to be developed there or from cats sourced from Australia. Development of new lines in Australia is very closely controlled by the registries there. A breeder must first have a permit before they can develop new bloodlines. Currently there are a couple of new lines being worked on – based on the addition of new Australian domestic outcrosses. All progeny anticipated to be used in subsequent generations are being genetically tested before they are bred further – selecting against such undesirable recessive factors as the pointed gene c^s and longhair.

Genetic Testing

Blood Typing

Many Australian Mists have already been genetically tested for a number of genetically carried ailments as well as Type b blood. One of the last group of domestics that was used was a Type b (A/b) carrier and it has shown up in the genetic testing. It is not felt that the gene pool is large enough to be divided into two groups – the A and the b blood types, so most Mist breeders are working to reduce then eliminate the b group over a period of time.

Pyruvate Kinase Deficiency (PK Def)

Dr. Lyons included some of the Australian Mists in a survey genetic testing in the United Kingdom and one or two were heterozygous for PK Def. Subsequent testing has been done and no homozygotes have been found. All of the cats imported from Australia to the U.S. have been tested and are negative. Selective breeding will eliminate this issue from the breed.

Burmese hypokalemia

A number of Australian Mists have been tested for Burmese hypokalemia and none have tested positive. No cases of the ailment have arisen either, so it is believed that the breed is free of the ailment.

Far Future Plans:

Dr. Straede always bred her Mists with health and temperament as major concerns and it is our intent to continue that legacy. She is also a scientist however and if there are further revelations in genetic testing in the future – such as highly disease resistant lines of cats – then I am sure that we could consider judicious outcrossing to such sources regardless of geographic location while still maintaining the type and temperament of the original breed.

THE INTERNATIONAL CAT ASSOCIATION, INC.
TRANSFER NEW BREED ADVANCEMENT TO ADVANCED NEW BREED

33.10 Advancement of Transfer New Breeds. Breeds that are Championship status in at least two full members of the World Cat Congress may apply to the TICA Board of Directors for acceptance in TICA at ANB level, or for a reduction in the time required to progress to the next level in the New Breed program. The Board of Directors will address applications on a case-by-case basis. The Board of Directors may approve, disapprove or impose additional requirements on the Breed, including, but not limited to, appointing a different Working Group Chair and requiring changes to the standard and/or breed name, or any other modification which the Board of Directors, entirely in their discretion, may require.

Name of breed: Donskoy

33.10.1 The breed must have been at Championship status for a minimum of 5 years in at least 2 full members of the World Cat Congress.

Names of WCC organizations:

1) WCF Number of years in championship: 17

2) FIFE Number of years in championship: 16

33.10.2 A minimum of 10 cats of the breed must have been registered in TICA during the 12 months preceding the application.

Attach to application a list of names and registration numbers.

33.10.3 Submission of an electronic Application for Advancement to each member of the Genetics Committee and each member of the Rules Committee at least 90 days prior to the board meeting at which approval is sought. Any proposed modifications to a previously approved standard must be submitted with the application. Following approval of proposal by the Genetics Committee and Rules Committee, the application must be submitted by the proposed Working Group Chair to the TICA Executive Office at least 60 days prior to the Board Meeting for inclusion in the agenda. Any comments of the Genetics Committee or Rules Committee must be included. The application must include the following: (applications available from the TICA Executive Office or at www.tica.org).

33.10.3.1 A letter of intent to apply for Advancement, signed by at least five TICA members in good standing;

Attach to application.

33.10.3.2 A proposed breed standard, approved by the Genetics Rules Committees, including any permissible outcrosses.

✓ Attach to application.

33.10.3.3 An indication that the breed is to be categorized as an Established Breed, a Natural Breed, a Mutation Breed or a Hybrid Breed and the rationale for the proposed category. (See RR 37.1.2).

_____ Native Breed

_____ Mutation Breed

_____ Domestic Hybrid Breed

_____ Domestic x Non-Domestic Source Species Hybrid Breed

33.10.3.4 A proposed Working Group Chair for the breed.

Working Group Chair: Kathryn Eden

33.10.3.5 A processing fee of \$50.

Attach copy of DAR.

THE INTERNATIONAL CAT ASSOCIATION, INC.
TRANSFER NEW BREED ADVANCEMENT TO ADVANCED NEW BREED

33.10.3.6 Statistics from the other organizations showing number of cats registered and shown during the last 5 years. If official statistics are not available, then copies of pages from show catalogues may be provided to demonstrate that sufficient cats have been shown and bred in other organizations to ensure it is a viable breed within TICA.

Attach to application.

33.10.4 A Notice of Intent to Apply for Advancement must be published in the TICA TREND at least 120 days prior to the meeting at which the application for advancement will be heard, and which invites comments about the breed to be forwarded to the Executive Office.

Date submitted for publication in the TREND: May 25, 2014

33.10.5 Make a formal presentation at the meeting of the Board of Directors.. Information presented should include photographs, illustrations, statistics, health and breeding reports, representatives of the breed and any other relevant material.

At the meeting of the Board where application is made: TICA 2014 Annual

DONSKOY (DSK)

HEAD	40 points
Shape	10
Ears	7
Eyes	6
Muzzle/Chin	7
Profile	6
Neck	4
BODY	40 points
Torso	15
Legs	9
Feet	8
Tail	8
COAT	20 points

CATEGORY: All
DIVISIONS: All

COLORS: All

PERMISSIBLE OUTCROSSES:
Domestic Shorthair, not a member of a recognized breed

HEAD:

Shape: Medium sized modified wedge with flat forehead and finely outlined cheekbones and eyebrows. The head is approximately 1/3 longer than it is wide. Just above and between the eyes is a palpable indentation.

Ears: Large, wide open, wide at the base, set upright and tilted slightly forward, neither low nor on top of the head. Set wide apart, about the width of the ear base. Outer edges of the ears continue the line of the head. Ear tips are rounded.

Eyes: Medium to large size in proportion to head size, almond-shaped, set slanted toward outer corner of ear. Not wide open. No relationship between eye color and coat color. Eyebrows may be whole, broken or totally absent.

Muzzle/Chin: The muzzle is clearly defined, of medium length in proportion to head size, slightly rounded, with a slight pinch. Canine teeth are long, may be protruding from behind the upper lip. Chin and jaws are well-developed. Whiskers may be curly, thick, broken, long or short, sparse or appear to be completely absent

from breakage.
Profile: Shows a definite curve to the straight nose of medium length, similar to a roman profile.

Neck: Medium in length in proportion to body size, rounded and well muscled. The neck arches from the base of the skull and is well set into angulated shoulders. Powerful, especially in males.

BODY:

Torso: Medium in size. Medium to medium-long in length, dense, muscular, strong-boned, with wide breast and croup. Deep groin-line. The abdomen is well-rounded, having the appearance of recently eaten a large meal, but not fat. Medium boning. Hard and muscular, not delicate. The male has stud jowls, a thicker neck, wider shoulders, and a broader head than the female. The male is more muscular and gets significantly larger than the female.

Legs: Length in proportion with body, with medium boning and firm musculature. Hind legs slightly longer than front. Front legs widely set. Females may have slightly finer boning.

Feet: Medium in size, oval with long slender toes. Toes are very long, slim and distinguished with thumbs that bend inward rather than downward on the front paws giving the appearance of slender hands (monkey fingers). Webs separate the long toes. Paw pads are thick and cushion-like giving the appearance of walking on clouds.

Tail: Whippy. Medium long, straight, tapering from body to tip. Length in proportion to body size. Young cats can have hair on their tails disappearing by the age of two. Older cats may have some residual fluff-hairs on the tail tip which is allowable although bald is preferred.

COAT: Skin is elastic, "excessive", with pronounced wrinkles on the cheeks, jaws and under the chin. Vertical wrinkles separate the ears and run down the forehead and spread into horizontal lines

above the eyes. Wrinkles are also found at the base of the neck, in the breast area, at the base of the tail, on the front and undersides of the legs, down the sides of the body to the underbelly and groin; the more wrinkles the better. Adults should retain as many wrinkles as possible, although wrinkling should not be so pronounced that it affects normal functions. Allowable residual flock coat on the whole body as well as short sparse fur on the muzzle, ear and legs. Allowance is to be made for residual fur on the "points" - muzzle, ears, legs and tail. The residual fur must fully disappear from adult cats by two years of age. Allowance will be made for sparse furnishing of fur trimming the whole body in winter. Slight down hair is tolerated. Full hairlessness is preferable. The texture of the bald and some of the flock coated cats offers resistance when their skin is stroked; it is similar to stroking a chamois. The texture of the velvet is smooth and soft, offering no resistance.

Coat Types:

Born Bald: Born bald and remain that way throughout its life. Show coat.

Flocked: Appears hairless; has the texture of a chamois. Show coat.

Velour: Born with a bald spot or Monk's cap on the top of the head. Body is covered with a wavy coat which disappears gradually within the first year. There may be some residual hair remaining on the face, legs and tail, but most are usually hairless by 2 years of age. Show coat.

Brush: Bristly, soft, wavy, often wiry fur on the whole body; bald area on the head, upper part of neck or on the back. Admissible for breeding program but not for show.

GENERAL DESCRIPTION:

The Donskoy is the result of a spontaneous mutation that originated in the city of Rostov-on-Don in Russia in 1987. The gene occurring from this spontaneous mutation is dominant and resulted in the first truly hairless cat. Donskoy cats are quite elegant and sturdy with strong boning. Males as a rule are generally larger than

females. The Donskoy is a very intriguing, unique, soft-hearted and social cat of medium size with soft hairless wrinkled skin that feels hot and velvety to the touch. The Donskoy is very active, friendly and highly intelligent. The Donskoy is very good-natured and gentle, easy to groom and handle as a result of their loving and amiable disposition.

ALLOWANCES: Lockets and white buttons

PENALIZE:

Head: Too short or round; long narrow wedge. Lack of wrinkles. Small or low set ears. Round eyes.

Body: Too cobby or foreign. Round paws, thin skin and/or not enough wrinkles. Standing tail that curls a total circle over the back (ring tail), sitting tail that does not hold close to the body or is laying straight along side the body. Significant amounts of hair above the ankle.

DISQUALIFY: Any indication of wavy hair, or suggestion of Devon Rex or Cornish Rex in molt; any evidence of depilating, plucking, shaving or clipping, or any other means of hair removal. One or both eyelids turned inward. Malocclusion greater than 2mm.

Temperament must be unchallengeing; any sign of definite challenge shall disqualify. The cat may exhibit fear, seek to flee, or generally complain about but may not threaten to harm. In accordance with Show Rules, ARTICLE SIXTEEN, the following shall be considered mandatory disqualifications: a cat that bites (276.9), a cat showing evidence of intent to deceive (276.10), adult whole male cats not having two descended testicles (276.11), cats with all or part of the tail missing, except as authorized by a Board approved standard (276.12.1), cats with more than five toes on each front foot and four toes on each back foot, unless proved the result of an injury or as authorized by a Board approved standard (276.12.2), standard requires disqualification (276.12.4), crossed eyes if Board approved standard requires disqualification (276.12.5), total blindness (276.12.6), markedly smaller size, not keeping with the breed (276.12.9), and depression of the sternum or unusually small diameter of the rib cage must (276.12.11.1). See Show Rules, ARTICLE SIXTEEN for more comprehensive rules governing penalties and disqualifications

Donna L. Madison

Portland, ME 04103

May 30th, 2014

To the BOD:

I am writing on behalf of the Donskoy Breed Group.

We have submitted a request application for a transfer new breed status and advancement to Advanced New Breed Status.

The breed is accepted in FIFE (Federation International Feline) and the WCF (World Cat Federation). The breed was accepted in WCF 1997. FIFE accepted the breed in or around the same time 1997-1998.

The breed currently has 8 members in the following regions.

NE ~ 2 members

NR ~ 2 members

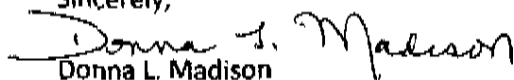

GL ~ 2 member

WE – 1 member

At this time we have two breeders in Russia who are going to sign up. I will get that information as soon as it is confirmed.

Of note is that the working breed chair is no longer a member and no longer breeding. I have talked to her and she gave me her permission to submit this application. Her name is: Evelyn Jacobs (evelynjacobs@shaw.ca).

Sincerely,

Donna L. Madison

Highlander Advancement to Advanced New Breed

The Highlander breed section members intend to request transfer to Advanced New Breed at the Winter board of directors meeting. Attached for your review is our advancement packet meeting all requirements for advancement.

33.7.1.1 At least 1 year has passed since the breed was first advanced to Preliminary New Breed Class Breed status: The Highlander has been in Preliminary New Breed status since May, 2008

33.7.1.2 At least 100 cats, which have attained the age of 8 months (at the time of application), are registered with TICA; of these, at least fifty (50) must either correspond to requirements for the assigned registration category for Championship or have a registration code such that the offspring could be eligible for Championship:

- Attachment #1 – Individual Highlanders Registered
- Attachment #2 – Individual Highlanders Registered Whose Codes are Eligible for Championship, or Whose Offspring Would be Eligible for Championship

33.7.1.3 At least 25 litters have been registered with TICA:

- Attachment #3 – Highlander Litter Registrations by Year
- Attachment #4 – Copies of 25 Litter Registrations

33.7.1.4 At least 15 TICA members in good standing, in at least five different regions are actively breeding the breed:

- Attachment #5 – TICA and Highlander Breed Section Members Actively Breeding the Highlander

33.7.1.5 At least 25 unique individual cats of the breed have been evaluated in TICA shows

- Attachment #6 – Individual Highlanders Shown in PNB 2008 – 2014
 - Pg 1: by Cat's Name
 - Pg 2: by Date
 - Pg 3: by Region
- Attachment #7 Shows Where Highlanders Have Been Shown 2008 - 2014

33.7.1.6.1 A Letter of Intent to apply for approval as an Advanced New Breed Class Breed, signed by at least ten TICA members in good standing

- Attachment #8 – Letters of Intent from HGBS Members

33.7.1.6.2 A proposed breed standard with permissible outcrosses:

- Attachment #9 – Highlander Standard With Changes for ANB Advancement

33.7.1.6.3 A proposed breeding program with any proposed changes:

- Attachment #10 – Highlander Breeding Program for ANB

33.7.1.6.4 A processing fee of \$50

- Attachment #11 – DAR of Processing Fee for Transfer to ANB

33.7.1.7. A Notice of Intent to Apply for Advancement to Advanced New Breed Class Status must be published in the TICA TREND at least 120 days prior to the meeting at which the application for advancement will be heard, and which invites comments about the breed to be forwarded to the Executive Office.

Date submitted for publication in the TREND: June 20th, 2014

Meeting of the Board where application will be made: Winter Meeting, January 23 -25, 2015

- Attachment #12 – Highlander Notice of Intent to Advance to ANB

The Highlander is a Category IV Domestic Hybrid breed. It is unique in the cat world, yet because of the use of domestic shorthairs with unknown backgrounds there is still quite a bit of variation in looks amongst the breed. Our goal for the foreseeable future while in Advanced New Breed is to tighten up our programs and breed for consistency within the breed. We will strive to ensure a unique look from other breeds which may, at first glance, appear to have similar traits. We can accomplish this by eliminating the use of outcrosses and breeding Highlander to Highlander, focusing on those traits which make the breed unique.

With the use of mutations we will continue to work diligently at breeding healthy and physically sound cats. We want to produce a cat that has a loosely curled ear, a naturally short tail from one inch to hock length, an inverted pear-shaped head with a square muzzle and wide nose bridge, and a muscular body with a deep torso. We have a Yahoo group and a Facebook group where we can mentor new breeders and exhibitors, as well as educate the public.

Application for Advancement from Advanced New Breed to Championship Status for Khao Manee

33.8.1 Requirements. A Preliminary New Breed may apply for Advanced New Breed status upon completion of the following:

33.8.1.1 At least 1 year has passed since the breed was first advanced to Preliminary New Breed Status. Advanced New Breed was approved Aug 30, 2013 and became effective Aug 30, 2013.

33.8.1.2 At least 200 cats, which have attained the age of 8 months, are registered with TICA; of these at least fifty (50) must either correspond to requirements for the assigned registration category for Championship or have a registration code such that the offspring could be eligible for Championship.

33.8.8 Submission of an electronic Application for Advancement to Championship to each member of the Genetics Committee and each member of the Rules Committee at least 90 days prior to the board meeting at which approval is sought. Any proposed modifications to a previously approved standard must be submitted with the application. Following approval of the proposal by the Genetics Committee and Rules Committee, the application must be submitted by the ANB Working Group Chair to the TICA Executive Office at least 60 days prior to the Board Meeting for inclusion in the agenda. Any comments of the Genetics Committee or Rules Committee must be included. The application must include the following: (applications available from the TICA Executive Office or at tica.org)

33.8.8.1 A Letter of Intent to apply for approval as a Championship Breed, signed by at least ten TICA members in good standing;

33.8.8.2 A proposed breed standard; (See 33.8.8) Include as a separate document in the application packet.

33.8.8.3 A proposed breeding program;

33.8.8.4 A processing fee of \$50. Include copy of DAR in application packet.

33.8.9 A Notice of Intent to Apply for Advancement to Championship Status must be published in the TICA TREND at least 120 days prior to the meeting at which the application for advancement will be heard, and which invites comments about the breed to be forwarded to the Executive Office.

At the meeting of the Board where application is made:

33.8.10 Make a formal presentation at the meeting of the Board of Directors, including photographs, illustrations, statistics, health and breeding reports, examples of the breed and any other relevant material.

33.8.8.3 A proposed breeding program;

KHAO MANEE BREEDING POLICY

GENETICS OF THE BREED AND ADVICE FOR BREEDERS

1: Statement of purpose of the Breeding Policy & background of the breed

This breeding policy is intended to give advice and guidance to new breeders of Khao Manees as more cats are imported and kittens are bred and sold for breeding. Health will be of paramount importance, and second to that will be the objective of selecting of Khao Manees to work towards the proposed Breed Standard which defines the ideal for a showbench specimen of the breed.

It is written as a statement of best practice. However, with the breed in its infancy in western cat fancies, and for which history, legend and myth are a fairly seamless blend in its native country, it's recognised that there will have to be periodic revision as more becomes learned and understood about this white cat of Thailand. It is good that we have the support of Dr Leslie Lyons and her team at UC Davis for projects concerning white cats and deafness and breed genetic diversity.

The roots and origins of the Khao Manee are parallel (and probably intertwined) with the other historic breeds from that part of the world: the Siamese Seal Point, Korat and Burmese. The Khao Manee (also known as the Khao Plort) is one of the breeds in the famous book of cat poems (Tamra Mao) which was produced at least as far back as 1350 and is a national treasure today. The four above mentioned are the most famous of about 17 breeds listed as lucky cats and represented their country on sets of stamps produced in 1971 and 1995. It is surprising that when the other three have become well established in the west it isn't until very recently that the Khao Manee has arrived here, but it's believed it has a natural place alongside the other ancient Thai breeds and so deserves recognition and preservation.

2: Selection for breeding

Although selective breeding has just begun, it is not imagined that it will be too difficult to fix and maintain type in the Khao Manee. The head and body shape are of medium size, ears medium to slightly large and the eyes are not required to dominate the face. This is a cat of no extremes, and although the odd-eyed is most prized in its native country the decision was taken not to place emphasis on this as it could restrict a gene pool which will be small in number and only increased by importation. Lines should not be excluded to aim for a very small number of a specified eye color.

What is essential is that breeders select healthy cats as foundation stock and maintain the solid build and muscular appearance that is called for. It's known that gradual loss of size and more delicate appearance in future generations could be an indicator of inbreeding depression. Because of the small number of imports initially there will be close monitoring of this factor. Due to their early limited genetic base, the TICA Breed Committee will recommend to its breeders that the size, health and temperament should always be checked in prospective parents as the main priorities.

Selection will also be made by pedigree checks to avoid the repetition of common ancestors. A Pawpeds data base is being established, but as yet too few ancestors are known to give sufficient generations for meaningful inbreeding coefficients. However, Prof Bateson's advice will be firmly kept in mind, "Avoid very close inbreeding. A good rule of thumb is that if the pedigrees of the potential mates include more than two (common) grandparents, avoid that mating." ("Independent Inquiry into Dog Breeding" – Sir Patrick Bateson FRS)

3: Genetic Makeup of the Breed

All cats have 19 pairs of chromosomes upon which there are many genes that govern the eventual shape, size, sex, color, pattern and hair length of the individual animal. Over the generations a number of mutations have occurred and selective breeding has been used to isolate these to produce the various pedigree breeds we see today. White which, with its geographic origin and short coat, defines the Khao Manee as a breed, would have been one of the early ones as it is found in the domestic populations throughout the world. However, unlike in other species, including people, in cats it is very rarely associated with albinism.

Like the White Persian, White British Shorthair or Foreign White the Khao Manee is a cat wearing a white overcoat. Dominant White (or correctly 'epistatic white' since it occurs on a different gene from the black or red based colors) is denoted by the gene symbol W. W cats do not have the pale blue/pink light sensitive eyes of the albino (cc), nor the nystagmus that is associated with this. Some kittens are born with a 'cap' (hairs on top of the head) of a different color, some have been born without the white overcoat, indicating that the parents are Ww, with the offspring inheriting the recessive (w) from both parents.

4: White cats and deafness

There is an established link in cats between the white coat color, blue eyes and deafness. The tapetum lucidum is generated from the same stem cells as melanocytes (pigment cells). The blue eyes of an epistatic white cat indicate a lack of tapetum. Deafness is caused by an absence of a cell layer in the inner ear that originates from these same stem cells as well. They fade out progressively in the first week or so after birth. However, although research has ascertained that more white blue eyed cats are deaf than white non-blue eyed cats, not all blue eyed cats are deaf and not all white non-blue eyed are hearing. Odd eyed cats, like some Khao Manees, may be deaf on one side (usually the side with the blue eye) but not all are.

So appearance (phenotype) is not a definite indicator of deafness. It is going to depend on genotype, the genes that the cat has inherited, and as yet the particular complex of genes governing deafness has not been identified, though work is ongoing at UC Davis and Baltimore. At present there no scientific proof to back the statement made by Sarah Hartnell in her summary on white/cat deafness research: "other types of blue eye are being discovered in all-white cats in Asia, the blue is different from Siamese Blue Eyes, but does not seem to cause deafness", it remains conjecture, but there is some anecdotal evidence from Khao Manee breeders in the west who are keeping records that the deafness is not occurring at the same frequency as it does in European originating blue eyed breeds.

White x white matings have been accepted practice in Thailand and, although the use of the non-standard colored Khao Manees is accepted in the registration policy, to ensure no exclusion of otherwise healthy cats of good type and new to the genepool, white x white is very highly advised.. Research to date (University of Baltimore, where there is an established colony of white cats, some blue eyed, others not) has shown an increased risk of deafness in the progeny if both parents are blue eyed, but not a distinction dependent on homozygosity/heterozygosity for W. So from knowledge to date the rationale for Khao Manee breeders is the premise that as dominant white is a complete dominant gene with no additive effect in its homozygous state (no proof existing that homozygous whites are more likely to be deaf than heterozygous whites) breeding white to white gives the opportunity to selectively breed to influence the polygenes against deafness, whereas random polygenes of non-white cats may skew away from the direction of the selective breeding.

Time and research results will give further information. In the meantime the proposed TICA breeding policy for the Khao Manee will advise strongly against the breeding of deaf cats.. Also this breeding policy strongly advises against the mating of blue eyed cat to blue eyed cat. A blue eyed cat may be used for breeding but should have a non-blue eyed or odd eyed partner. On what is known to date these strategies should reduce risk of deafness occurring.

Notes:

A) Careful note will be taken of new research on white cats and deafness produced by veterinary medical faculties, and this policy will be revised according to recommended best practice based on such results.

B) The TICA Khao Manee Breed Committee will keep a record of Khao Manee kittens born. It is recommended that a cat that produces deaf offspring on two occasions with different partners is no longer used for breeding (unless participating in a study directed by veterinary/genetic counselling).

5: Other issues

It is known that skin cancer may affect any cat with white ears, including domestics. Breeders will be advised to give new owners information of its possible occurrence and the necessity for the use of suitable sun block products.

As yet no other genetic problems are known to have occurred in the Khao Manee, but of course it is impossible to say they never will, only to reiterate that it will be essential to keep records and breeders will be encouraged so share information for the good of the breed as a whole.

There has been a very high percentage of cats with kinked tails amongst the cats imported from Thailand. It is recognised that this a common trait in cats from that part of world. Since the Written Thai Standards that we have seen for the Khao Manee all mention that the tail should be long, yet rather minor tail kinks that do not substantially shorten the tail are not seen as faults in it's native land, we feel that breeders should not, at least at this time, select only for straight tails. As it has no major impact on health and welfare, breeders are recommended initially to focus on genetic diversity (eg not all going to the only male with the straight tail) yet avoid selecting for tails that are significantly shortened. Records are being kept and sent to Dr. Leslie Lyons Lab along with DNA swabs regarding hearing status, tail kink status, eye color, kitten "cap," and homozygosity/heterozygosity when known. We are also keeping photographic records of offspring, noting white spotting patterns on ww non-standard colored kittens.

6: Genetic Diversity

Dr. Leslie Lyons has recently informed us that the gene for dominant white has been found and that it is associated with the genes for white spotting and gloving. It is now possible to have a DNA test performed to differentiate homozygous WW from heterozygous Ww dominant white. The Khao Manee breeders are now cooperating with Dr. Lyons in providing a photo history of nearly all TICA KM litters including much additional information. We are continuing to send DNA swabs to Dr. Lyon.

She plans to use our information to try to determine why the incidence of deafness is relatively low in Khao Manee, how homozygosity and heterozygosity differ in depth of expression of the dominant white gene and to try to identify any poly-genes that may be associated with depth of expression. Perhaps she will be able to identify that breeding white to white is a viable method to reduce incidence of deafness in white cats. This section will be further developed once results have been produced.

At present Dr Lyons is collecting Khao Manee samples to produce a genetic diversity score and the cats imported to the USA and to the UK have contributed DNA. Records are being kept and conveyed to Dr. Leslie Lyons Lab along with DNA swabs from each kitten born regarding hearing status, tail kink status, eye color, kitten "cap," suspected genetically influenced disease, and homozygosity/heterozygosity when known. We are also keeping photographic records of offspring, noting white spotting patterns on ww non-standard colored kittens.

The Khao Manee breed section voted to accept the Korats and Maew Boran (TICA Experimental Breed) as allowed outcrosses, but still maintain 3 generations before SBT. The section also voted to allow white cats from Malaysia, Burma and Viet Nam to be registered as Khao Manee in the same manner as white cats from Thailand.

There is discussion about allowing European Burmese and European Tonkinese and possibly some TICA Thai as outcrosses, but we don't know how to make sure that other more extreme versions of these breeds would be excluded.

33.8.8.2 A proposed breed standard; (See 33.8.8) Include as a separate document in the application packet.

STANDARD:

Khao Manee (KM) (re-worded 4/28/14)

HEAD	40	Points
Shape	10	
Forehead	4	
Profile and nose	4	
Eyes	5	
Eye color	5	
Ears	5	
Muzzle and chin	5	
Neck	2	
BODY	40	Points
Torso	10	
Legs and feet	10	
Tail	5	
Boning	10	
Musculature	5	
COAT/COLOR/PATTERN	20	Points
Texture and length	12	
Body color	8	

CATEGORY: Traditional

DIVISIONS: Solid

COLORS: White

PERMISSIBLE OUTCROSSES: Cats born in Thailand, Malaysia, Burma or Viet Nam of very average, moderate body and head type. Cat breeds that originate in Thailand, have proof of Thai ancestry and maintain moderate conformation resembling SE Asian cats; Korat, and the Experimental TICA breed, Maew Boran.

HEAD:

Shape: Modified wedge, medium width, moderate length. From full front, face appears elliptical, with focus points just below outer corners of eyes. Fairly prominent cheek bones also lie along an inner ellipse with same focus points. Tip of nose and tips of ears form points of equilateral triangle. Inner eye corners lie along line from nose tip to ear tip.

Forehead: Long; very slightly convex.

Profile/Nose: Nearly straight, but with slight, straight, downhill slope from brow to just below eyes. Nose may have a slightly convex profile.

Eyes: Slightly to moderately large. But not oversized, nocturnal or protruding. Plump oval in shape. Set a bit more than an eye width apart. Lines drawn from corner to corner of each eye slant toward 10 and 2 o'clock

Eye Color: Odd-colored, one blue and one green or yellow, two blue, two green, or two yellow eyes. One or both eyes may be pigmented with both blue and another color. Brilliance of eye colors and eye color contrast preferred. Any eye colors accepted.

Ears: Slightly large, wide at the base, oval tips. They should be somewhat longer than width at base. Ears should point toward 11 and 1 o'clock . Ears should be well separated from each other, a bit less than an ear base width apart. Allow for light furnishings.

Muzzle: Medium in length and width. Muzzle break is moderate, forming boundary of hemispheric, rounded muzzle.

Chin: Moderate, proportional to the nose.

Neck: Medium in length and width.

BODY:

Torso: Medium. Underbelly is mostly firm, level and parallel to the ground, but some loose skin on the underbelly is permissible.

Legs: Medium to slightly long.

Feet: Oval in shape, medium in size in proportion to cat.

Tail: Medium. Proportional to the body, tapering gradually to the tip. Tail tip kinks accepted.

Boning: Medium to slightly refined (females) or medium to slightly robust (males).

Musculature: Very firm, but cat should look agile and feel flexible and springy, not meaty or heavy. Males should have more muscle than females, but should not be cobby or thick-necked.

COAT/COLOR/PATTERN:

Texture: Resilient and slightly open, smooth enough to reveal musculature, with a moderate under coat in most circumstances, very natural, not overly groomed, not coarse nor very fluffy, naturally varies with environmental temperature.

Length: Medium length short coat, naturally varies with environmental temperature.

Body Color: Very even, snowy white.

GENERAL DESCRIPTION:

The ideal cat of this breed is a medium-sized cat of semi-foreign type, descended from and resembling the native Khao Manees of Thailand. It is a shorthaired, completely white cat with odd-colored eyes, or same-colored eyes. Indeed, the original eye color of the breed may have been limited to blue.

The history of the Khao Manee probably began when the Thai people developed the Khao-plort, an all-white cat with “mercury” colored eyes (most likely gray-blue eyes). The Khao-plort is described in the *Tamra Maew*, the Siamese Cat Poems of Thailand that are 200 to 700 years old. It is not certain when the cat fanciers of ancient Siam began to favor odd-colored eyes in their Khao-plort cats, but they must have done so by about 100 years ago at latest. The cats at that point came to be called Khao Manees, which means “white gem.” Khao Manee as of the twentieth century had become the preferred name in Thailand for the breed, although the breeders still often use Khao-plort as an alternative name.

Khao Manees are derived from the native race of cats still seen in Thailand today. Like other native cats of Thailand, they should have characteristics suitable for the hot, wet, tropical climate, including a lithe, but not extreme, body, medium length nose (handles hot air better than short noses), a very short smooth coat, and muscular and athletic but never bulky body.

Preserving the resemblance to native Khao Manees includes, for example, preserving the natural sexual dimorphism. (Males should typically be 8 to 11 pounds and may have slightly heavier boning than females. Females should typically be 6 to 8 pounds.) It implies that characteristics more typical of Western breeds, such as very round heads are to be avoided.

The personality of the Khao Manee, like that of all the native cats of Thailand, is communicative, though not necessarily noisy. They are active, playful, curious cats. They love to interact with people and hate to be left alone and ignored. The Khao Manee is highly intelligent. This is not a reserved, self-sufficient, independent breed. But it is a great breed for those who like cats that are all but human in their personalities and needs.

ALLOWANCE:

Stud jowls in males. Males also have significantly heavier chest and shoulder musculature. Colored spots limited to the head in kittens and young adults only. Tail faults that do not significantly shorten the length of the tail or significantly distract from the overall appearance.

PENALIZE:

Males resembling female cats in size, boning, or musculature. Females so large, heavy in boning or musculature that they resemble males. Round eyes. Oriental eyes. Short or blunt muzzle. Very long or pointy muzzle. Narrow upper head or narrow space between ears. Small ears, very large ears, or ears set low or high (significantly above or below 11 and 1 o'clock). Very straight profile. Tail fault that noticeably shortens the length of the tail.

WITHHOLD WINS (WW):

Roman profile. Pronounced stop. Pronounced convex forehead. Fluffy or stand-out coat. Cobby body. Obesity. Colored markings or clumps of colored hairs on cats over 18 months of age. Paw pads and nose leather other than pink.

DISQUALIFICATION:

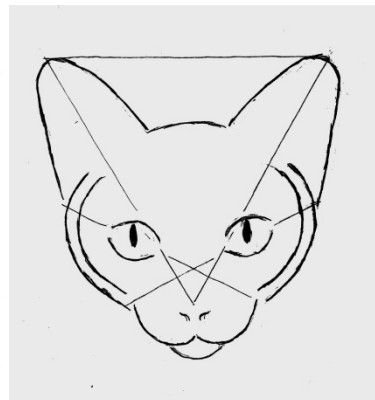

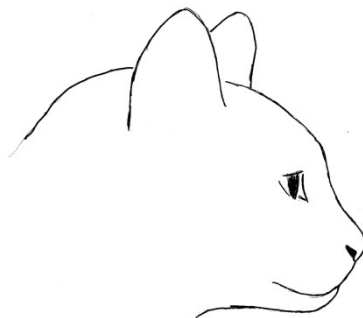

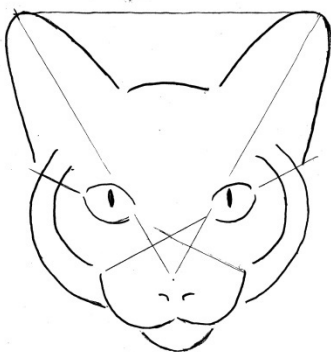

Crossed eyes. Visible protrusion of the cartilage at the end of the sternum (xiphoid process).

DIAGRAMS:

male

profile

female

Temperament must be unchallenging; any sign of definite challenge shall disqualify. The cat may exhibit fear, seek to flee, or generally complain aloud but may not threaten to harm.

In accordance with Show Rules, ARTICLE SIXTEEN, the following shall be considered mandatory disqualifications: a cat that bites (216.9), a cat showing evidence of intent to deceive (216.10), adult whole male cats not having two descended testicles (216.11), cats with all or part of the tail missing, except as authorized by a board approved standard (216.12.1), cats with more than five toes on each front foot and four toes on each back foot, unless proved the result of an injury or as authorized by a board approved standard (216.12.2), visible or invisible tail faults **if Board approved standard requires disqualification** (216.12.4), crossed eyes **if Board approved**

standard requires disqualification (216.12.4), crossed eyes **if Board approved standard requires disqualification** (216.12.5), total blindness (216.12.6), markedly smaller size, not in keeping with the breed (216.12.9), and depression of the sternum or unusually small diameter of the rib cage itself (216.12.11.1). See Show Rules, ARTICLE SIXTEEN for more comprehensive rules governing penalties and disqualifications.

THE INTERNATIONAL CAT ASSOCIATION, INC.

PROPOSAL TO AMEND STANDARDS

By-Laws

17.4 Duties of the Breed Committees. It is the duty of the Breed Committee to represent the Breed/Breed Group Section members on any proposed Breed Standard change, amendment or deletion, submitted by any bona fide voting members of the Breed/Breed Group Section. Any proposal submitted to the Breed Committee must be approved by a majority vote of the Committee prior to the Breed Committee Chairperson forwarding the proposal to the Genetics and Rules Committees for review and approval. It is the responsibility of the Breed Committee Chairperson to forward any approved proposal to the aforementioned Committees within 5 days of approval by the Breed Committee and to return any proposal not approved by the Committee to the person or persons originally submitting the proposal. Individual Breed Committee members may attach comments to any breed proposal submitted to the aforesaid committees or individuals. Upon approval of the Genetics and Rules Committees, the proposal must be forwarded to the Executive Office for balloting of the Breed/Breed Group Section in accordance with 118.2 (2005)

118.2 Amendment of Existing Standards. Proposed Standard amendments including but not limited to the addition or deletion of colors or the adoption of a new Standard for a recognized breed shall be submitted by the Breed Committee Chairperson to the Genetics, and Rules Committees 120 days prior to the Board meeting at which the changes are to be considered. The Genetics and Rules Committees shall act on the proposal within 15 days of receipt. Upon approval of the Genetics and Rules Committees, the Executive Office shall issue a ballot to all bona fide voting members of the Breed/Breed Group Section(s) no less than 100 days prior to the Board Meeting at which the changes are to be considered, to be counted by the official TICA Ballot Judge. Financial responsibility for said poll shall rest with the requesting party(ies).

118.2.2 Breed/Breed Group Section Members shall have at least 45 days from the date of mailing to return the ballot to the TICA Ballot Judge.

118.2.3 Upon receipt of the results of the poll, the Executive Office shall place the proposed changes on the Agenda of the next Board Meeting with the official results of the poll. The Board of Directors may approve the proposal, reject it or refer it back to the Breed/Breed Group Section(s) with suggestions for revision.

Standing Rules

1018.2 Amendments. Proposals to amend Standards shall be considered by the Board of Directors at annual or semi-annual meetings and must be in writing and received in accordance with ARTICLE EIGHTEEN, 118.2 of the TICA By-Laws. **Proposals must be received by the Genetics and Rules Committee no later than 120 days prior to the opening day of the meeting.** Proposals received after the 120-day deadline will be placed on the following meeting agenda.

1018.2.1.1 Notification. Members are to be notified of action taken at the Board Meeting on proposals submitted by them with a target date of 10 working days after completion of the minutes.

STANDARD TO AMEND: Maine Coon (MC) DATE: 9/24/2014

List below the changes to the current standard:

Title: "Maine Coon (MC)" is changed to "Maine Coon Breed Group (MC/MCP)"

Add line: "This Breed Group is comprised of the Maine Coon (MC) and the Maine Coon Polydactyl (MCP)."

Feet: Add "MC:" Keep "Large, round, well-tufted." Add "MCP: Large, well-tufted. Additional toes allowed on either fore or hind paws or both. Paws may be mitten or patty foot. Symmetrical expression preferred."

Maximum of 7 toes on any foot." (continued, page 2)

Rationale for proposed change:

Breeders of polydactyl Maine Coons have been advised to work with the Breed Committee to reach a compromise in the advancement of the polydactyls from New Traits into Championship. One solution suggested was the creation of a Breed Group to accommodate tracking and to separate the polydactyl from the straight-foot Maine Coons. This document proposes the necessary changes in the Maine Coon Standard to accomplish the formation of a Breed Group and the integration of the Maine Coon Polydactyl into Championship.

This form must be received by the Genetics and Rules Committees no later than **120** days prior to the opening day of the meeting.

Changes to the current Standard (Continued from Page 1)

General Description:

Delete "... a long, hard muscled, rectangular body and a long flowing tail." Add "...a long, hard muscled, rectangular body, a long flowing tail, and large feet with tufts."

Allowances:

Add: "Polydactyly is a trait with variable expression and may produce anything from a single extra dew claw to extra toes on each foot. Any of these expressions are acceptable and there is no preference for more rather than fewer additional toes. Polydactyl mitten paws may appear to toe out."

Penalize:

Add: "Feet: Toes (excluding dewclaws) not touching the table."

ADDITION OF DEFINITIONS TO GLOSSARY:

Mitten foot: Polydactyl paw where four toes are in a normal position along with a thumb and possibly additional toes that are separated from the normally placed toes, giving the appearance of a hand or baseball glove.

Patty foot: Polydactyl paw where all toes are equally spaced, forming a large, symmetrical foot.

Proposed Changes to the Maine Coon Standard

1. "Maine Coon (MC)" is changed to "Maine Coon Breed Group (MC/MCP)"
2. Add line: "This Breed Group is comprised of the Maine Coon (MC) and the Maine Coon Polydactyl (MCP)."
3. Under Feet: Add "MC:" Keep "Large, round and well-tufted." Add "MCP: Large, well-tufted. Additional toes allowed on either fore or hind paws or both. Paws may be mitten or patty foot. Symmetrical expression preferred. Maximum of 7 toes on any foot."
3. Under General Description: Delete "... a long, hard muscled, rectangular body and a long flowing tail. Add "...a long, hard muscled, rectangular body, a long flowing tail, and large feet with tufts."
4. Under Allowances: Add "Polydactyly is a trait with variable expression and may produce anything from a single extra dew claw to extra toes on each foot. Any of these expressions are acceptable and there is no preference for more rather than fewer additional toes. Polydactyl mitten paws may appear to toe out."
5. Under Penalize: Add "Feet: Toes (excluding dewclaws) not touching the table."

ADDITION OF DEFINITIONS TO GLOSSARY:

Mitten foot: Polydactyl paw where four toes are in a normal position along with a thumb and possibly additional toes that are separated from the normally placed toes, giving the appearance of a hand or baseball glove.

Patty foot: Polydactyl paw where all toes are equally spaced, forming a large, symmetrical foot.

MAINE COON BREED GROUP (MC/MCP)

This Breed Group is comprised of the Maine Coon (MC) and the Maine Coon Polydactyl (MCP).

HEAD.....40 points

COAT/COLOR/PATTERN 25 points

Length	10
Texture	5
Color	5
Pattern	5

CATEGORY: Traditional.

DIVISIONS: All.

COLORS: All.

PERMISSABLE OUTCROSSES: None.

Overall balance and proportion are essential to the Maine Coon and no one feature should dominate the eye's attention over any other.

HEAD:

Shape: Broad, modified wedge. Size in proportion to body. Slightly longer than wide. Distinct muzzle break can be seen under high prominent cheekbones

Eyes: Large, slightly oval, appear round when wide open. Outer corner of eye points toward outer base of ear. Wide-set. Color: Any shade of green and/or gold. No relationship to coat color. Blue and odd-eyes

accepted in whites and particolors.

Ears: Large, wide at base with outer base set just slightly farther back than inner base. Outer base just above the level of the top of the eye. Outside edges have a very slight outward tilt that is not past eleven and one o'clock. Set fairly high on head with inner edge of ear bases no more than one ear's width apart. Taller than the width at base but still in balance with head length. Moderately pointed ears appear taller due to lynx tips. Furnishings extend beyond outer edge of ear.

Chin: Wide and deep enough to complete square look of muzzle. Firm, in line with upper lip.

Muzzle: Square.

Profile: Gently curving forehead. Gentle concave curve at bridge of nose flowing into a smooth nose line. Slight nose bump allowed in kittens.

BODY:

Torso: Large, long, substantial, rectangular, equal in breadth from shoulders to hips. Broad chest. Level back. Females may be noticeably smaller than males.

Legs: Medium length to form a rectangle with the body.

Feet:

MC: Large, round and well-tufted.

MCP: Large, well-tufted. Additional toes allowed on either fore or hind paws or both. Paws may be mitten or patty foot. Symmetrical expression preferred. Maximum of 7 toes on any foot.

Tail: At least as long as the body. Wide at base and tapering to tip with full, flowing fur.

Boning: Substantial.

Musculature: Substantial, powerful

COAT:

Length: Uneven; shorter on shoulders, gradually lengthening down the back and sides. Long, full, shaggy belly fur and britches. Tail fur long, full, flowing. Frontal ruff becomes more developed with age.

Texture: All weather coat. A slight undercoat gives the coat body but coat still falls smoothly. Not cottony.

Color: Particolors must have some white on all four feet.

GENERAL DESCRIPTION: The Maine Coon is America's native longhaired cat. The breed, with its essentially amiable disposition developed through a natural selection process where only the fittest survived. It should always be remembered that the Maine Coon developed basically as a "working cat" able to fend for itself in rough, woody terrain and under extreme climatic conditions. The Maine Coon is a large breed with big ears, broad chest, substantial boning, a long, hard muscled, rectangular body, and a long flowing tail, and large feet with tufts.

ALLOWANCES: Standard favors the male. Allowance MUST be made for a significant size difference between the male and the female. Type should not be sacrificed for size. Breed is slow to mature. Allow for tighter earset in kittens and wide earset in mature adults. Polydactyly is a trait with variable expression and may produce anything from a single extra dew claw to extra toes on each foot. Any of these expressions are acceptable and there is no preference for more rather than fewer additional toes. Polydactyl mitten paws may appear to toe out.

PENALIZE:

Eyes: Slanted, almond-shaped. Flat tops on openings.

Ears: Very close, set straight up. Narrow bases. Wide set, flared.

Feet: Toes (excluding dewclaws) not touching the table.

Chin: Weak or receding, narrow, lack of depth.

Muzzle: Prominent whisker pads.

Profile: Straight. Roman nose.

Pronounced bump.

Torso: Narrow. Tail: Short tail.

Coat: Lack of slight undercoat or belly shag. Overall even coat.

Color: Obvious lockets.

Temperament must be unchallenging; any sign of definite challenge shall disqualify. The cat may exhibit fear, seek to flee, or generally complain aloud but may not threaten to harm. In accordance with Show Rules, ARTICLESIXTEEN, the following shall be considered mandatory disqualifications: a cat that bites (216.9), a cat showing evidence of intent to deceive (216.10), adult whole male cats not having two descended testicles (216.11), cats with all or part of the tail missing, except as authorized by a board approved standard (216.12.1), cats with more than five toes on each front foot and four toes on each backfoot, unless proved the result of an injury or as authorized by a Board approved standard (216.12.2), visible or invisible tail faults if Board approved standard requires disqualification (216.12.4), crossed eyes if Board approved standard requires disqualification (216.12.5), total blindness (216.12.6), markedly smaller size, not in keeping with the breed (216.12.9), and depression of the sternum or unusually small diameter of the rib cage itself (216.12.11.1). See Show Rules, ARTICLE SIXTEEN for more comprehensive rules governing penalties and disqualifications.

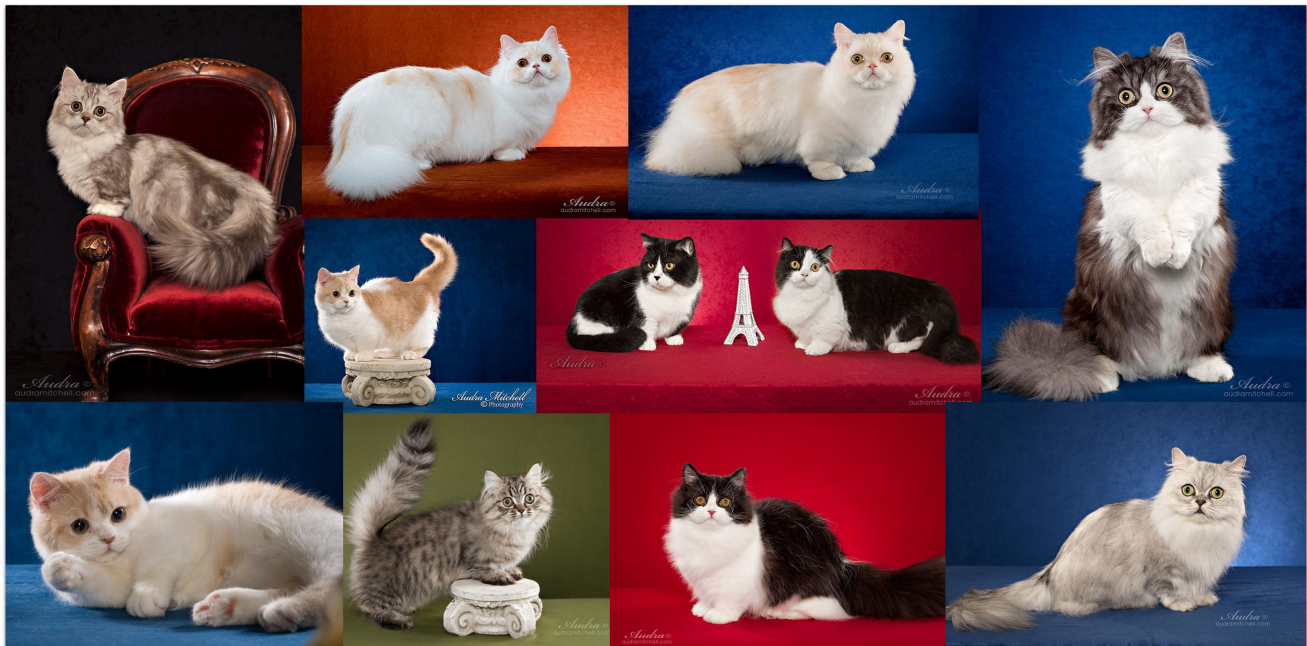

**Request for advancement to championship at the winter meeting in January
Also a request for name change from Napoleon to Neapolitan.**

**With great pleasure I am proud to say the Neapolitans have met the TICA Requirement to
request advancement to championship.**

**We as a breed group have completed all the necessary requirements for advancement.
Each Requirement is listed with information below**

Samantha L McConnell, Working breed Chair October 21 2014

Championship Status upon completion of the following:

33.8.1 At least 1 year has passed since the breed was eligible to compete in the Advanced New Breed class. The Board of Directors at its discretion may reduce the time required of a Transfer New Breed.

The Napoleon Breed Group was placed in Advanced New Breed Status on August 29, 2013

33.8.2 A minimum of 200 adults registered in any full member association of the World Cat Congress (WCC) of which a minimum of 50 are registered in TICA at a level potentially eligible for championship competition. Listed on Pg. 4 & 5

The TICA report dated 10/14/2014 lists

Total number of Napoleons registered for 2014 as 157

In 2014 there were 55 whole males registered

In 2014 there were 83 whole females registered

In 2014 there were 19 alters registered

The TICA report dated 10/14/2014 lists

33.8 10.1- Breeders must Submit Evidence of Sufficient Activity of Interest

Below I have attached photos of our TICA members at shows traveling to show off their breed and meet fellow breeders. Terri Harris has been working with Dr. Leslie Lyons, Formerly of UC Davis.

They are working on locating the Gene(s) located with the dwarfism in cats.

Several breeders have sent in DNA samples to help locate this gene(s) over 60 cats dna samples sent.

Below are photos of us and our cats at shows.

This is our Family and here we are showing and Promoting our breed together!
Below is our TICA Family, They have brought us together in the show halls, in our hearts, and in our lives.
We have been to over 40 shows and met so many people. We have also Attended MTB's in Sept. 2013

In September 2013 We attended Meet The Breeds

We joined the Munchkins in a booth to help show the public the difference between our breeds. What was nice was the Persians were benched right across from us so everyone could to see the difference. We are our own breed, we may look alike from a distance but once you get your hands on us we promise we are nothing alike! We are sweet, laid back lovable cats who just wanna make you smile like any other cat.

From my experience there the public got to feel, pet, love on and learn a lot about our breed. Conner, Shana, and myself really enjoyed being there that day. Conner a JE in the NE

Pg. 13.

Here is a copy of the standard that has not been changed straight from the TICA website.

NAPOLEON BREED GROUP (NP/NPL)

The Napoleon and the Napoleon Longhair are short legged, medium to substantially boned cats. They are distinguished only by the appearance of the coat with the shorthair having a plush all weather coat and the longhair a long silky coat with britches and a plumed tail.

HEAD	40 points	snub. Top of the nose leather should not come above the lower edge of the eye.
Shape	10	Profile: Gentle curve to a moderate stop
Eyes	10	Neck: Head should blend into moderately short neck.
Ears	8	
Chin/Nose/Muzzle	7	
Profile	4	
Neck	1	

BODY	40 points
Legs	10
Torso	8
Tail	7
Boning	7
Musculature	8
Feet	2

COAT	20 points
Length	10
Texture	10

CATEGORY: All.

DIVISIONS: All.

COLORS: All.

PERMISSIBLE OUTCROSSES: Persian Breed Group, Munchkin Breed Group.

HEAD:

Shape: Round, broad, with well rounded contours when viewed from any angle. Cheeks moderately full, top head rounded but not domed.

Ears: Medium with preference given to slightly smaller ears but not extreme Rounded tips. Set wide apart.

Eyes: Large and round, wide open but not protruding. No brow ridge. Deep brilliant eye color is preferred which conforms to coat color.

Chin: Rounded and moderate

Muzzle: Moderately short and broad with well rounded whisker pads.

Nose: Moderately short, broad and with an obvious stop, but no break; not

BODY:

Torso: Semi-cobby, well rounded. Straight top-line preferred, slight rise from the shoulders to tail is acceptable.

Legs: Short, well developed, firm musculature. Outer upper thigh boning and musculature may be thick and pronounced due to short legs. Inner leg straight with little to no bowing though slight bowing is acceptable.

Feet: Rounded and neat, tufts on longhairs.

Tail: In proportion to body length or longer, not short. Long hairs should be plumed and flowing

Boning: Medium to substantial. In front, legs should be short and straight from the breadth of the chest adding to sturdy appearance.

Musculature: Substantial, firm and noticeable on front legs, not to be confused with bowing

COAT/COLOR/PATTERN:

Length (NP): Short. Dense but slightly longer than other shorthairs; standing away from body.

Length (NPL): Semi-long, guard hairs long and straight. Stands away from the body. Noticeable ruff but not extreme. Seasonal variations in coats shall be recognized. Britches are shaggy.

Texture (NP): Short, plush double coat preferred, all weather, not lying flat.

Texture (NPL): Soft, slight undercoat gives the coat body but coat still falls smoothly. Not cottony. Possible curls on underbody.

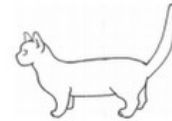

CONDITION AND BALANCE: Good muscle tone; well-muscled, but not fat. Legs disproportionately short but no more than 2/3 shorter than the body length to avoid overly short legs.

GENERAL DESCRIPTION: The Napoleon is a hybrid of the Persian Breed Group and the Munchkin breed group. The desired result is a cat that resembles the Persian of earlier eras with the shortened legs of the Munchkin. The ideal Napoleon is an active cat with a playful attitude, medium sized and strong with noticeable boning and musculature, especially on the short hair group. The cat should have a very open and round face with a sweet expression and large eyes that do not tear. The coat should be non-matting

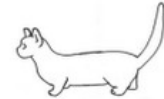

LOCKETS: Allow

PENALIZE: Brow dome, snub nose, wedge shaped head, thin muzzle, large pointed ears, small and close set eyes, tearing, inadequate nose, tiny nares, protruding sternum, tail fault, crossed eyes. Legs that are too short, less than 1/3 the length of the body.

DISQUALIFY (DQ): Nose break, severe malocclusion, non-standard leg length, severe tail fault.

PROPER LEG LENGTH

TOO SHORT

Temperament must be unchallenging; any sign of definite challenge shall disqualify. The cat may exhibit fear, seek to flee, or generally complain aloud but may not threaten to harm. In accordance with Show Rules, ARTICLE SIXTEEN, the following shall be considered mandatory disqualifications: a cat that bites (216.9), a cat showing evidence of intent to deceive (216.10), adult whole male cats not having two descended testicles (216.11), cats with all or part of the tail missing, except as authorized by a board approved standard (216.12.1), cats with more than five toes on each front foot and four toes on each back foot, unless proved the result of an injury or as authorized by a Board approved standard (216.12.2), visible or invisible tail faults if Board approved standard requires disqualification (216.12.4), crossed eyes if Board approved standard requires disqualification (216.12.5), total blindness (216.12.6), markedly smaller size, not in keeping with the breed (216.12.9), and depression of the sternum or unusually small diameter of the rib cage itself (216.12.11.1). See Show Rules, ARTICLE SIXTEEN for more comprehensive rules governing penalties and disqualifications.

TICA:

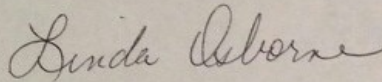

Please allow me to introduce myself. I am Linda Osborne of Windysweptt Cattery in Texas. I am a napoleon/neapolitan breeder and have been for several years. I adore this sweet breed and completely enjoy sharing them with others. Wherever I go with one, I get the chance to tell about the breed and help convert more people to these sweet cats.

I intend to continue breeding napoleon/neapolitans and working to help them advance to championship status. As soon as I retire, I plan to begin attending shows so I can further help this breed advance in all ways.

Besides the goals of showing, I take my napoleons/neapolitans to schools and share them with autistic students, and it is always their most favorite day of the year. I am also looking into taking them into nursing homes in a pet therapy fashion. You see, napoleons/neapolitans can be promoted in many, many ways, and I intend to continue finding more and more fun ways to do that. I think promoting this wonderful breed is a fantastic way to promote TICA and all the wonderful breeds it accepts. It is another way to expand the cat fancy and share the cats we love with the world.

Thank you for considering us for advancement.

Sincerely,

Linda Osborne

To Whom it May Concern;

I have been breeding quality Napoleon kittens since 2008. I have been working on producing a kitten to show in year 2015.

I have attended a few TICA shows in order to see what they are about, what is expected of me and what is expected of the cats entered therein.

I look forward to showing my own Napoleon offspring in year 2015.

Thank you for your time and consideration

Melissa M. Witmer

PG 16

Greetings to the board of directors:

My name is Gloria Owens. I am a AKC judge and breeder. I have finished 70 Champion dogs since 1973, most of which I bred under my Windjammer prefix. I focus on health, soundness and beauty. When I judge, people whisper that I am a "head hunter". Yes, they do need a pretty head but also must be structurally sound.

I also have a passion for Neapolitan cats and breeding and perfecting them. These cats are very important to me. I love the temperaments and overall look of them. I feel that they are the best cat for my taste; with their short little legs and their bold expressions and beautiful heads. They act like little dogs by the way that they meet and greet strangers. Their short strong little legs are a big plus, and because of them, they are even more unique. The blend of Persian and Munchkin is nice. I build on the Persian's sweetness and overall look and blend it so that my cats end up with a high percentage of Persian and a small amount of Munchkin. The look ends up with a medium sized cat with dwarf legs and a huge open face with huge non tearing eyes, no break in the nose and all the silliness and beauty you could want in a cat. They are also very healthy because of the general lack of entropion to the eyes, agility from the Munchkin, depth of chest and sweetness from the Persian.

All that being said, I have a wonderful vision for these Neapolitan cats in the future of TICA! I have been selling the kittens to show and new breeder homes to help increase the number of quality new breeders. I plan to mentor them in showing and breeding so that we can increase comroddity, sportsmanship and quality of our wonderful new breed.

I am also excited for the new name, Neapolitan. It is light and has no ties to any country. It also is a popular ice cream which can be played in lots of ways for advertising.

I want to make TICA proud of our great breed. Thank you TICA for all that you have done for our breed.

Humbly yours,

Gloria Owens

Dear TICA Board of Directors,

Thank you so much for your consideration in advancing Napoleons/Neapolitans to championship. I have been so very blessed to be a part of the ongoing development and advancement of this unique and wonderful breed. My first litter was born on Christmas Eve 2006. Since then it has been wonderful to see so many breeders come together and work together to define and redefine the standard, help each other out through education and mentoring, and get the cats out to shows and into the hands of judges all over the world. It is exciting to see the beautiful consistency in conformation that has developed over the last eight years.

As we move forward I expect you will see so many more Napoleons/Neapolitans in the show halls since we have many new people beginning breeding programs now. These cats capture the hearts of everyone they meet which means an ever growing population of breeders, showers and happy pet owners as time goes on.

I myself have only ever bred Napoleons/Neapolitans and it is the only breed I ever plan to work with. I enjoy several happy, healthy litters each year working always to come ever closer and closer to the perfect show cat. Over the past year and a half I have had the opportunity to attend several shows and have thoroughly enjoyed the experience, education, atmosphere and people at each one. Below are photos of my two best show girls. I love their big round eyes and open sweet expressions that are key to a great Napoleon/Neapolitan look and which sums up their wonderful personalities as well.

Again, thank you for your consideration to advance Napoleons/Neapolitans to Championship and I look forward to seeing you in the show halls!

~Kristin DuBois, Blueskies Cattery

Purrrpleace Cattery
Hinckley, MN
Neapolitan Cats and Kittens

I am dedicated to this wonderful breed and would like to see it move forward to the next level with TICA. I plan to breed as close to the standard as possible to keep the quality of the Neapolitan consistent with the outlined description.

I also plan to show my cats and hope to produce some of the first Neapolitan champions. I feel this is an excellent way to make the public aware of what is happening with this outstanding breed of cats. I plan to encourage people that purchase kittens from me to become active in showing. A group of us in Minnesota are beginning a new club to make showing our cats in TICA easier.

I hope we can move forward to the next level.

Sincerely,

Sandra Groleau

Dear TICA Board of Directors,

I would like to first thank you for your time in considering the request for our name change from Napoleons to Neapolitans. I feel this is a good move for the breed as we move forward with hopefully advancing to Championship class with a fresh start.

I have shown and bred Munchkins for several years. I also have the privilege of working with my daughter Samantha in breeding and showing our Napoleons (Neapolitans). I have enjoyed being a part of a family like TICA. I have met many friends along the way. I have traveled along side of my daughter and my husband Scott in showing our cats together. We have enjoyed this journey as a family not just by blood but bonded with those that have a love for the cats as we do.

We have all worked so very hard with this unique and wonderful breed. The two breeds, Munchkins and Neapolitans are special to many of us. They are two very distinctively different breeds and the Neapolitans deserve the chance to show the world who they truly are. They were a hit at the big event in New York at "Meet the Breeds".

As we move forward I would hope to see larger groups of us coming to shows and going to public events to spread the word that these are an amazing breed standing on their own. It is an exciting venture to be a part of a large group of people with so many common goals.

As the breed continues to grow worldwide and has captured the hearts of most all they meet I look forward to the opportunity to attend shows and educate those that come to see them.

Again, thank you for your considerations to the name change and advancement of the Neapolitans to Championship and I look forward to seeing you in the show halls!

Sincerely,

Sherri Mcconnell of Rugrunners Munchkins

Dear TICA Board of Directors,

October 20, 2014

I would like to take the opportunity to thank you for your consideration in advancing the Napoleons/Neapolitons to championship into TICA.

Our family has been actively involved in breeding and showing Exotic shorthairs in CFA since 1997. We became involved in this breed in 2012 when I obtained my first Napoleon/Neapoliton kitten from Terri Harris. My mother has been involved in showing horses, dogs and cats for over 35 years and offered to help me start off with my Napoleon girl for show. Once we got this amazing girl from Terri, we were hooked on the breed and started a very serious show program. My mother wanted to develop our own bloodline for more of a genetic diversity to offer this realitively new breed and that is what we are doing now and focusing on a rare color variety.

my goals are the same as my mother's, to create a healthy, good temperament show cat that will be successful in the show hall and/or someone's beloved beautiful companion.

We have been happy to join this breed group and meet new breeders and hopefully contribute to its future. I would like to thank Terri for her friendship and support and generosity in not only sharing some of her cats to help start our breeding program. I hope TICA will consider adding this wonderful breed to its esteemed list of championship breeds.

Again, thank you for your consideration to advance Napoleons to Championship.

Sincerely,

Tori Lydick

Wundrland Napoleons

Dear TICA Board of Directors,

I want to express my passion for the advancement of Napoleons to championship, and thank you for this opportunity. My involvement with the breed began in 2008, and I have been delighted to watch this breed grow in popularity as people discover how special these cats are. They are not only beautiful to the eye and relatively low maintenance, but also balanced in personality. They are wonderful companions.

With their lovely attributes, they will only continue to grow in popularity with new breeders and owners bringing the cats to the show hall. I feel that showing and the ability to show at championship level is important as it encourages breeding for the standard, beauty, balanced temperaments and healthy conformation. This helps to promote breeding standards for the future, encouraging the beauty and balanced temperament that makes this breed a treasure.

With passionate and established breeders and many new breeders working in unison, this breed has taken off globally. I look forward to seeing this beautiful breed continuing in the show halls and flourishing with TICA.

Thank you for your consideration,

David Hodge Little Frenchmen Cattery

Dear TICA Board of Directors,

October 20, 2014

I would like to take the opportunity to thank you for your consideration in advancing the Napoleons/Neapolitons to championship into TICA.

Our family has been actively involved in breeding and showing Exotic shorthairs in CFA since 1997. We became involved in this breed in 2012 when my daughter wanted a Napoleon/Neapoliton kitten to join our family. I contacted Terri Harris to help us on our search and became intrigued with the breed after having many long conversations with Terri about the Napoleons and their development as a new hybrid breed. We had our first litter in early 2013 and out of our second litter, produced a very nice litter that Wundrland S Dealer GiftofMagi came out of and he earned the highest scoring Napoleon of 2013.

I have only worked with Persians and Shorthair Exotics in cats and only bred for show. Our goals are to create a healthy, good temperament show cat that will be successful in the show hall and/or someone's beloved beautiful companion. My main goal here is for showing and to be part of the foundation of this breed by developing our own bloodline. Health and temperament and type are without question my priorities for our involvement in this breed. I am active in any health or genetic testing with our cats now and mentor other new breeders when asked or needed, we also assist in pure breed rescue when possible.....I would like to continue that with this breed as we do with our Exotics.

We have been happy to join this breed group and meet new breeders and hopefully contribute to its future. I would like to thank Terri for her friendship and support and generosity in not only sharing some of her cats to help start our breeding program.

I have included several pictures of three of our Napoleon kittens we have had this past year for your viewing.

Again, thank you for your consideration to advance Napoleons to Championship and I look forward to seeing you in the show halls!

Sincerely,

Ann Lydick

Wundrland Napoleons

Hello, My name is Connie Rodriguez. I am a TICA member and use Napoleons in my breeding program. I have fallen in love with this breed, not just for their captivating looks, but for their amazing personalities. These wonderful cat greet our company at the door and demand attention. They have absolutely no fear of strangers and prefer to be in the lime light. I have a beautiful Napoleon that meets the current standard and am anticipating that the Napoleons/Neapolitans, make Championship soon. I have a very extensive list of people waiting for kittens and all of our kittens leave our home TICA registered. When the Napoleons make Championship, their will surely be an out pour of people seeking these beauties! If you have any questions at all, please do not hesitate to call me.
Yours Truly,
Connie Rodriguez

On Request we have more letters from other breeder's and owners who show and support our breed.

I am a member of TICA and the Highlander breed section. The Highlander has been a Preliminary New Breed since 2006. In the past few years our small group has worked diligently on the advancement of our breed. We have now met or exceeded all advancement requirements. I therefore support the submission of our advancement packet to request a transfer to Advanced New Breed, and thank the TICA Board of Directors for considering the Highlander for advancement.

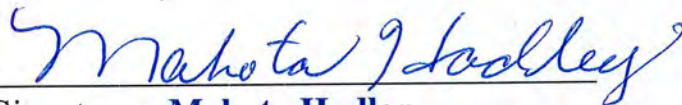

A handwritten signature in black ink, appearing to read 'Stephanie Ford', with stylized, overlapping loops and flourishes.
