Treats and/or catnip
List of emergency contacts
List of hotels that accept pets
List of veterinary clinics (emergency, 24-hour)

Before an emergency happens:

- Assemble your Emergency Kit and have it ready to go if you have to evacuate. If you can’t keep everything together all the time, then maintain a kit with duplicates or almost all of the items, and when you are notified of an impending event, then get the rest pulled together for evacuation.
- Identify evacuation routes so you can research hotels/motels that accept pets. If you hear on the news that an event (hurricane, flooding, etc) may hit your area, call the hotel/motel in advance and reserve a room!
- Along that evacuation route also identify 24-hour emergency clinics that you can get to if you have the need.
- Get to the store and get your supplies!!
- Charge up your phone and computer or pad so you can contact family and friends via email, text, Facebook and Twitter.
