Ten thousand years ago, the Egyptians  
were some of the first cat lovers!

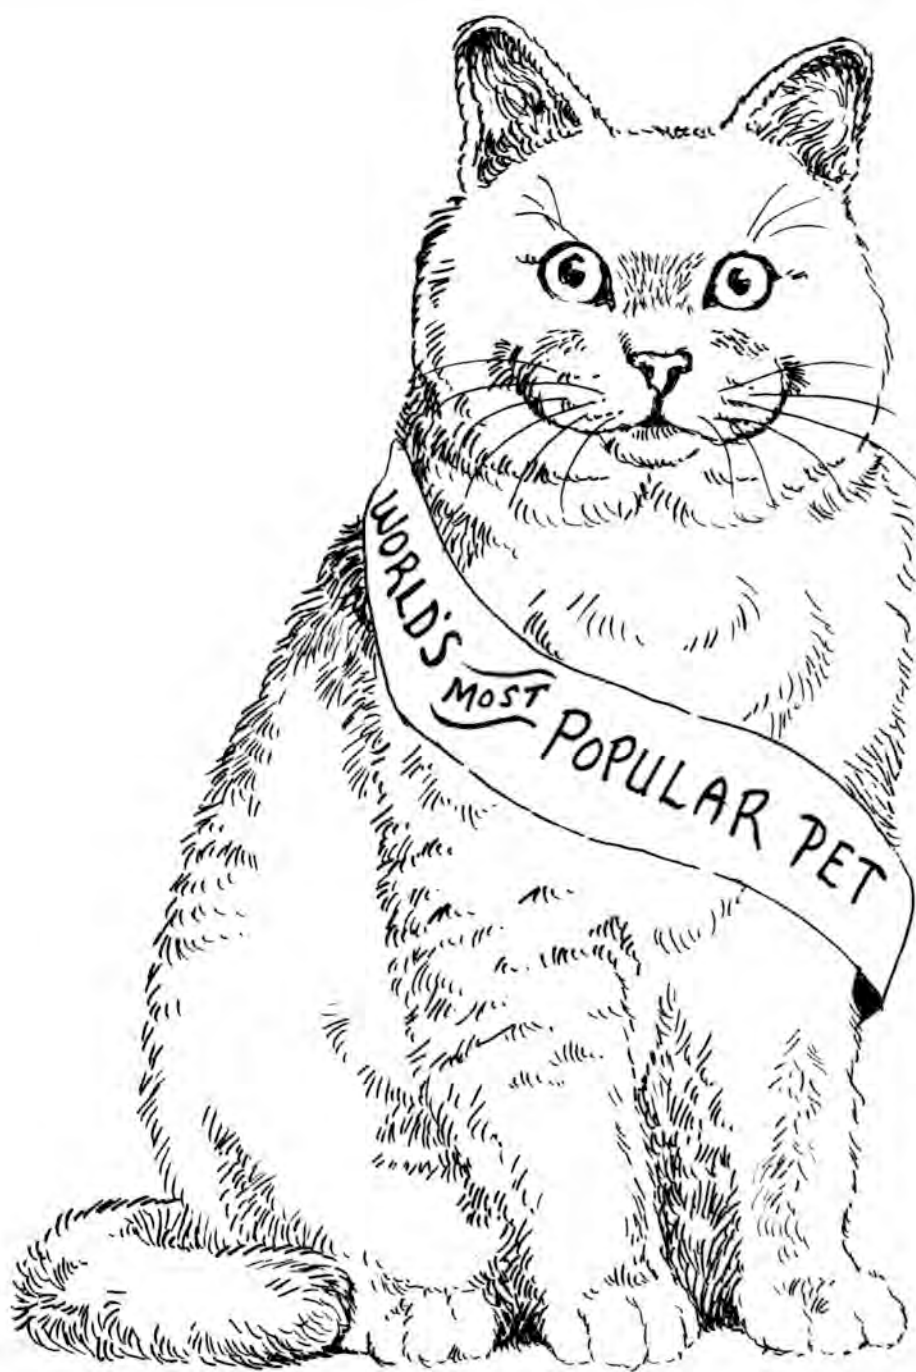

Cats protected the Egyptians' food and grain.  
They do that better than any other animal in the world.

Cats traveled the world as an important member of ships' crews. They protected food, grain and even the ropes from rats and mice.

Today, they are the world's most popular pet!

Cats depend on us for everything!  
They need good food and fresh water every day.

A visit to the veterinarian at least once a year  
makes sure they are healthy.

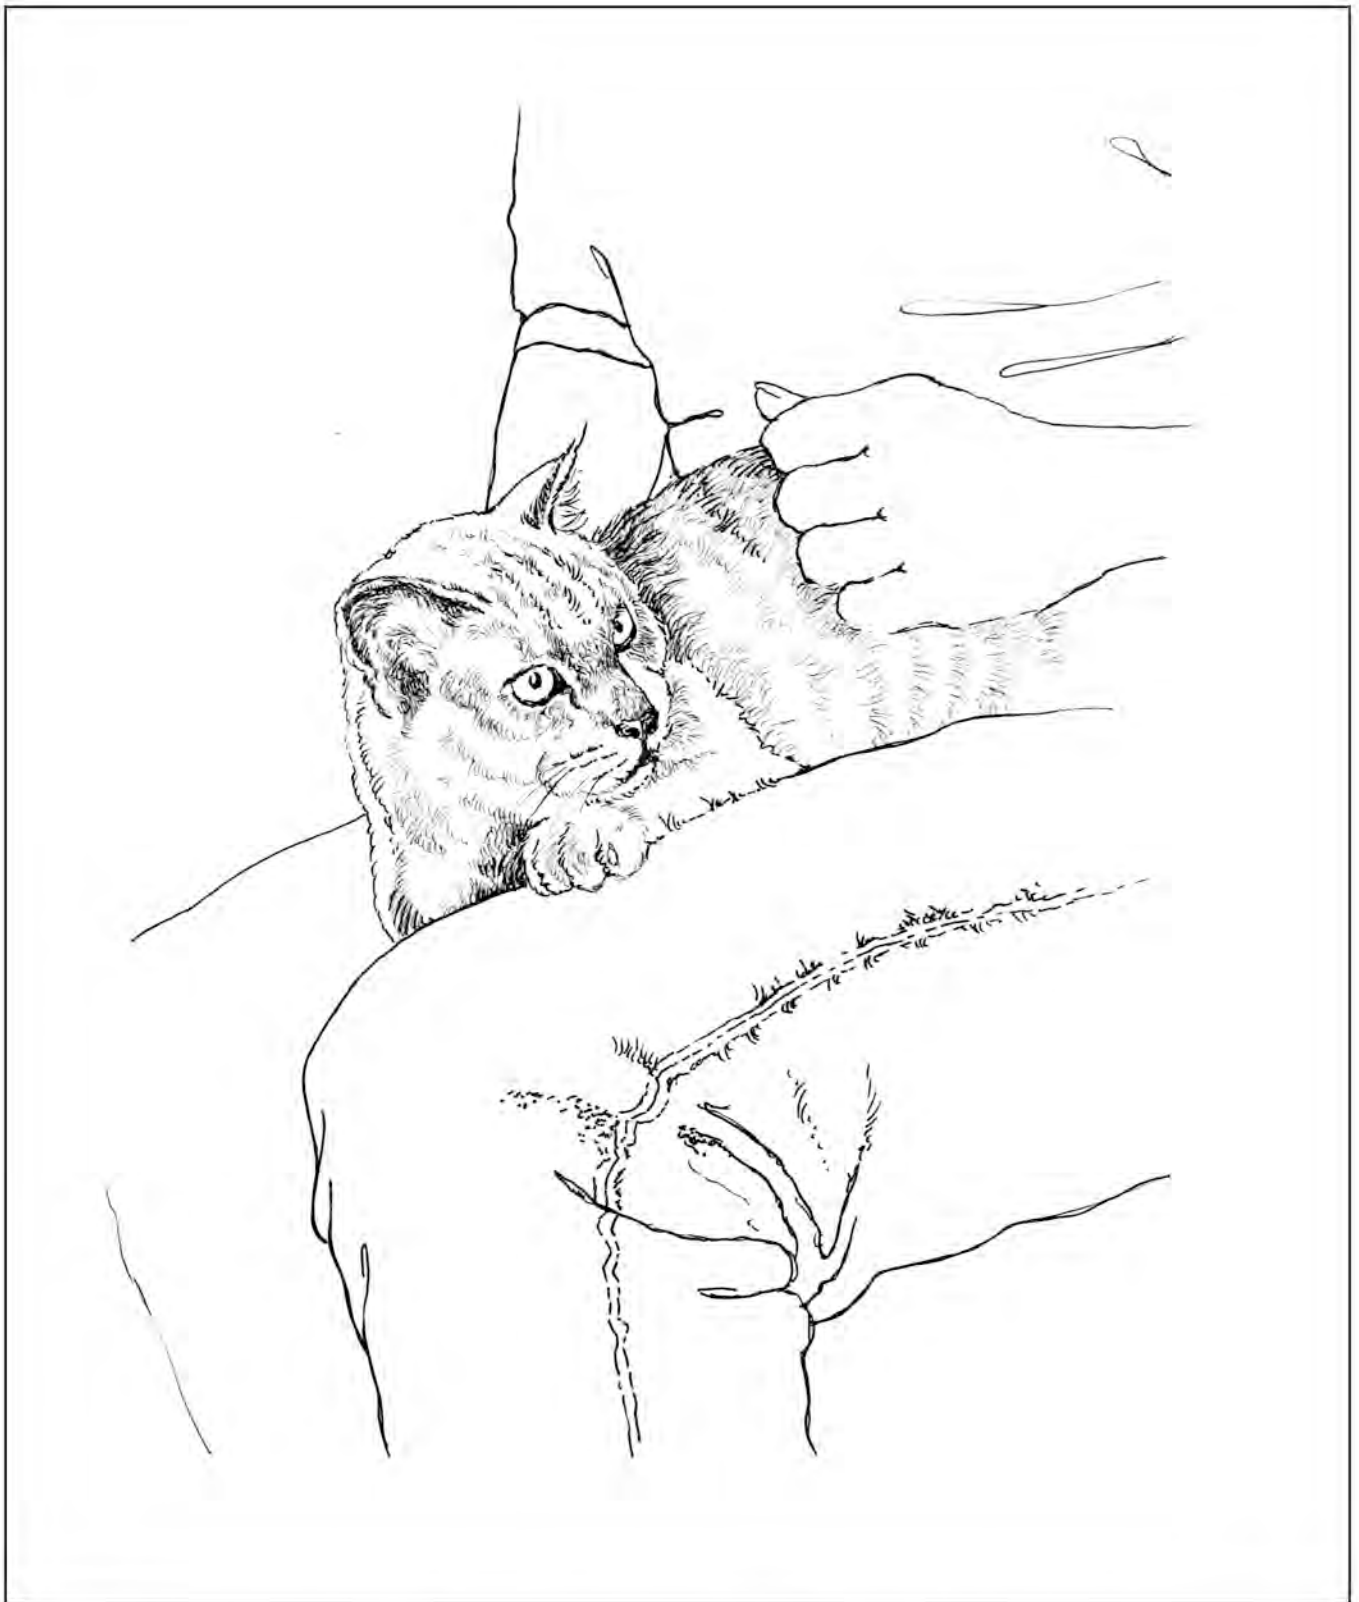

Protecting them means keeping them  
safely in the house.

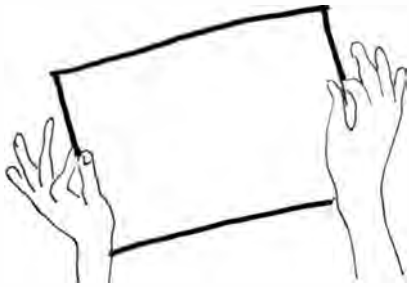

They are happy if we play with them everyday.

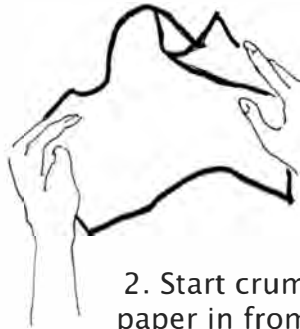

If they are happy, healthy and safe — they will be your friend!

# Let's Make a Cat Toy!

All you need is a piece of paper, a marker, and your two hands!

1. Smooth paper out flat.

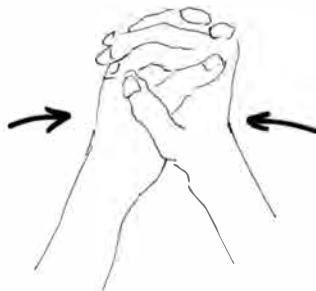

2. Start crumpling paper in from both edges.

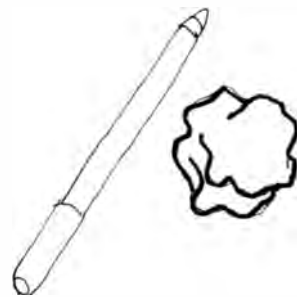

3. Work toward the center using equal pressure.

4. Repeat until ball takes shape.

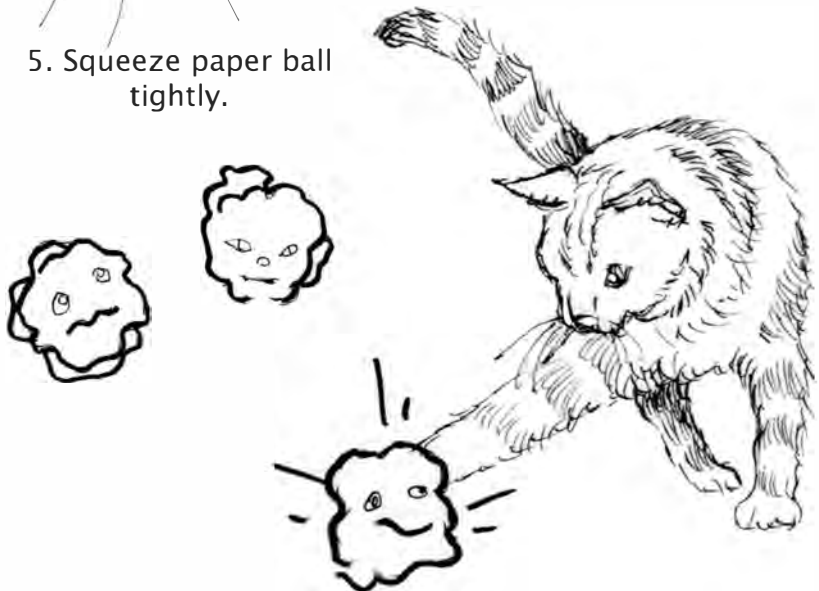

5. Squeeze paper ball tightly.

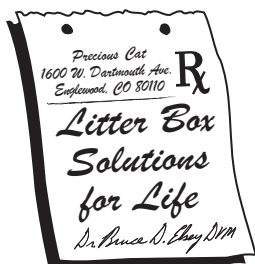

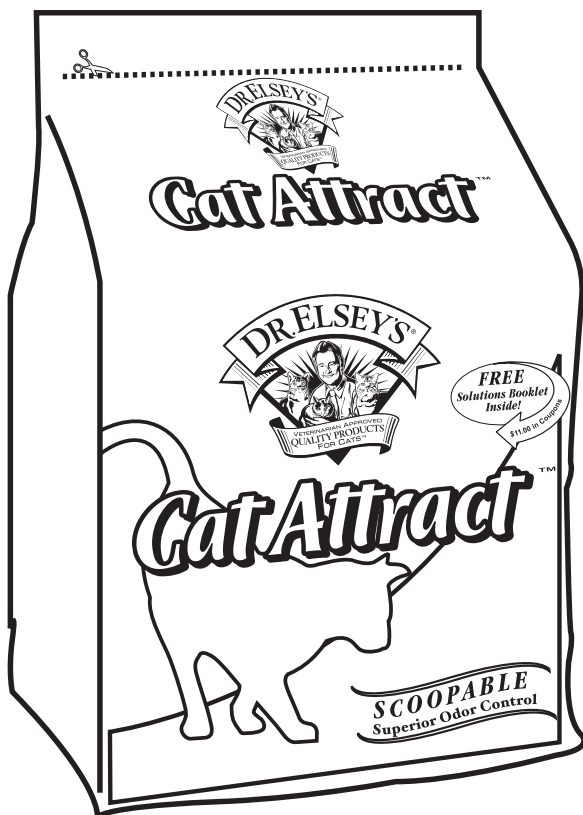

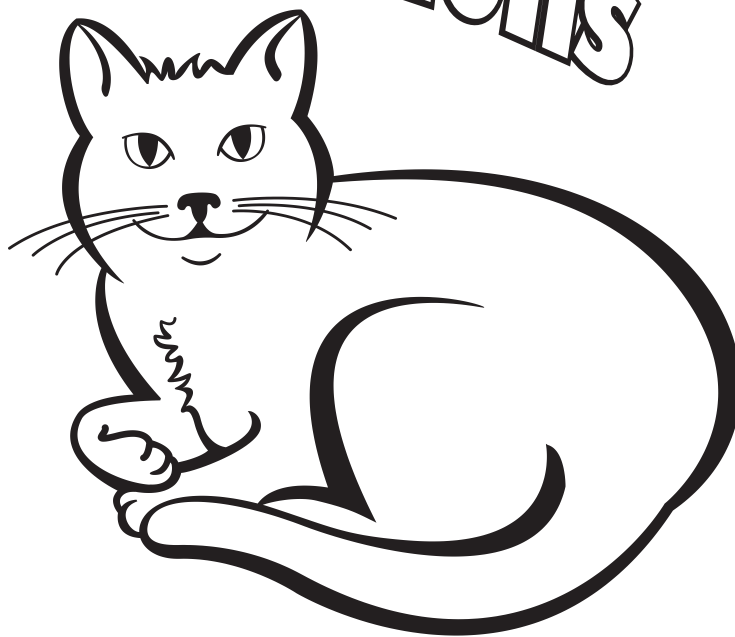

6. Use a marker to draw a face.

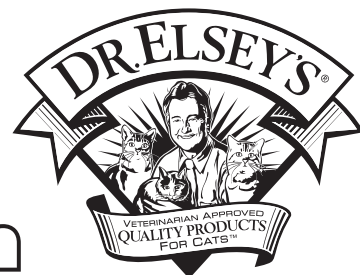

7. That's it! Now toss the toy to your kitty and watch the fun begin!
